The accompanying notes are an integral part of these condensed interim financial statements.

1. NATURE AND CONTINUANCE OF OPERATIONS

Evolution Global Frontier Ventures Corp. (formerly Ascension Exploration Inc.) (the “Company”) was incorporated on October 13, 2016 under the Business Corporations Act, (British Columbia) as Ascension Exploration Inc. On June 8, 2020, the Company changed its name to Evolution Global Frontier Ventures Corp. The Company is engaged in the acquisition, exploration and development of mineral resource properties located in Canada.

The Company’s head office and records office is located at 810 - 789 West Pender Street, Vancouver, British Columbia, Canada, V6C 1H2. Effective December 11, 2020, the Company shares traded on the Canadian Securities Exchange.

The recovery of the amounts comprising mineral properties is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their exploration and development, and upon future profitable production.

These condensed interim financial statements have been prepared by management on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. At June 30, 2021, the Company had not yet achieved profitable operations, had accumulated losses of \$412,156 (September 30, 2020 - \$220,860) since its inception, and expects to incur further losses in the development of its business, all of which casts significant doubt about the Company’s ability to continue as a going concern. A number of alternatives including, but not limited to selling an interest in one or more of its properties or completing a financing, are being evaluated with the objective of funding ongoing activities and obtaining working capital. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future and repay its liabilities arising from normal business operations as they become due.

The condensed interim financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

Since March 2020, several measures have been implemented in Canada and the rest of the world in response to the increased impact from novel coronavirus (COVID-19), which include the implementation of travel bans, self-imposed quarantine periods and social distancing. COVID-19 has caused material disruption to businesses globally resulting in an economic slowdown. These measures could adversely affect and harm the Company by limiting access to our exploration and evaluation assets, which could prevent the Company from meeting its exploration expenditure obligations. The measures and disruption to business globally could potentially impact the ability to procure new exploration and evaluation mineral properties. The Company continues to operate its business at this time. While the impact of COVID-19 is expected to be temporary, the current circumstances are dynamic and the impacts of COVID-19 on business operations cannot be reasonably estimated at this time. It is difficult to reliably measure the potential impact of this uncertainty on the Company’s future financial results.

2. SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance and basis of presentation

These condensed interim financial statements, including comparatives, have been prepared in accordance with International Accounts Standards (“IAS”) 34, “Interim Financial Reporting” using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and Interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”).

These condensed interim financial statements should be read in conjunction with the audited financial statements of the Company as at and for the year ended September 30, 2020.

The condensed interim financial statements have been prepared using accounting policies consistent with those used in the Company’s 2020 audited financial statements.

The condensed interim financial statements have been prepared on a historical cost basis, except for certain financial instruments classified at fair value through profit or loss which are stated at their fair value. In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting.

The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company’s accounting policies. The areas involving a higher degree of judgment of complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 3.

Foreign exchange

The functional currency of an entity is the currency of the primary economic environment in which the entity operates. The functional currency of the Company is the Canadian Dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21, The Effects of Changes in Foreign Exchange Rates.

Transactions in currencies other than the Canadian Dollar are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are translated at the period end exchange rate while non-monetary assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are included in comprehensive loss.

3. SIGNIFICANT ESTIMATES, ASSUMPTIONS AND JUDGEMENTS

The preparation of the condensed interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The condensed interim financial statements include estimates which, by their nature, are uncertain. The impact of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Information about critical judgments in applying accounting policies and sources of estimation uncertainty that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the condensed interim financial statements within the next financial year are the same as those that applied to the Company’s 2020 annual financial statements.

4. MINERAL PROPERTIES

Pichogen Property

On June 1, 2020, and amended on July 20, 2020 and on January 12, 2021, the Company entered into an option agreement whereby it could earn a 90% interest (subject to a 3.0% net smelter royalty “NSR” and a 3.0% Gross Overriding Receipts “GOR” in one hundred and thirty eight (138) mineral claims situated in the Walls Township area of the Province of Ontario.

9. SEGMENTED INFORMATION

The Company operates in one reportable operating segment, being the acquisition and exploration of mineral properties in Canada. As the operations comprise a single reporting segment, amounts disclosed also represent segment amounts.

10. FINANCIAL AND CAPITAL RISK MANAGEMENT

The three levels of the fair value hierarchy are:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – inputs that are not based on observable market data.

The Company enters into financial instruments to finance its operations in the normal course of business. The fair values of cash and accounts payable approximate their carrying values due to the short-term maturity of these instruments. The Loan bears simple interest of 10% and has an 18 month term. The Loan was accounted for at amortized cost using the effective interest rate method with the effective interest rate of 15% per annum.

The fair value of the Company’s financial instruments has been classified within the fair value hierarchy as at June 30, 2021 as follows:

June 30, 2021	Level 1	Level 2	Level 3	Total
Financial Assets				
Cash	\$ 10,590	-	-	\$ 10,590
	\$ 10,590	-	-	\$ 10,590

The Company is exposed to varying degrees to a variety of financial instrument related risks:

Foreign exchange risk

The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. Management believes the foreign exchange risk derived from currency conversions is negligible. The foreign exchange risk is therefore manageable and not significant. The Company does not currently use any derivative instruments to reduce its exposure to fluctuations in foreign exchange rates.

Credit risk

The Company’s cash is largely held in large Canadian financial institutions. The Company does not have any asset-backed commercial paper. The Company maintains cash deposits with Schedule A financial institution, which from time to time may exceed federally insured limits. The Company has not experienced any significant credit losses and believes it is not exposed to any significant credit risk.

Interest rate risk

Interest rate risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Financial assets and liabilities with variable interest rates expose the Company to cash flow interest rate risk. The Company does not hold any financial liabilities with variable interest rates. The Company does maintain bank accounts which earn interest at variable rates but it does not believe it is currently subject to any significant interest rate risk.

10. FINANCIAL AND CAPITAL RISK MANAGEMENT (CONT'D)

Liquidity risk

The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances and through short-term borrowing. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments.

Price risk

The ability of the Company to explore its mineral properties and the future profitability of the Company are directly related to the market price of precious metals. The Company monitors precious metals prices to determine the appropriate course of action to be taken by the Company.

Capital management

The Company defines its capital as shareholders' equity. The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration and development of mineral properties. The Board of Directors do not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The properties in which the Company currently has an interest are in the exploration stage. As such, the Company has historically relied on the equity markets to fund its activities. In addition, the Company is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will need to raise additional funds. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.
