

SOLDERA MINING COMMENCES WORK ON WHABOUCHI SOUTH

April 15, 2021 – Vancouver, B.C. – Soldera Mining Corp. (CSE:SOLD) (OTC PINK:SLDMF) (“Soldera” or the “Company”) is pleased to announce that it has commenced a high resolution, 25m line spaced 900km long heliborne magnetometer survey on its 100% owned Whabouchi South Project. The results of this survey will be used to interpret structural features and geological contacts, aiding in the understanding, and targeting of pegmatite dykes that may contain lithium minerals, with the goal of identifying mineralized pegmatites similar to those identified at the Whabouchi Mine, located less than 5km north of the Company’s Whabouchi South Project. Preliminary airborne survey results are expected within a week, with a final report expected to take four to six weeks.

Gary Benninger, CEO, states, “We were fortunate to be able to get a geophysical crew so quickly and being able to have preliminary results in early spring will help us plan future field work. Our expectation is to be able to identify key regional structural features on the property that may be corridors for pegmatite dykes – along with contacts between geological units – that will help us focus field work to build ranked targets on the property for field checking.”

In addition, the Company has entered into an agreement with MMG Market Medium (MMG) pursuant to which MMG will provide the Company with marketing services for an aggregate of EUR 600,000. MMG will utilize its online programs to generate a greater following, increase investor awareness and attract new investors through various online platforms and methods of engagement.

About the Company

Soldera Mining is a resource exploration company with an increasing focus on clean energy. The Company is based in Vancouver, B.C. and holds an option over the Titan Gold Property located in the Klotz Lake area in Northwestern Ontario, and also owns the Whabouchi South lithium exploration property located in the James Bay/Eeyou Istche region of Quebec. In addition, together with its partner, ORF Technologies Inc., based in Toronto, Canada, the Company is working on the development of a proprietary solution to produce green ammonia and green hydrogen, and is also investigating revolutionary catalyst methods to react Nitrogen & Hydrogen together with the aim of creating 100% clean, and cost effective green, turquoise, and blue ammonia.

Soldera trades on the CSE under the symbol SOLD and on the Frankfurt exchange under the symbol: 601, WKN: A2AFD1
