HIGHLIGHT

Since December 31, 2019, the outbreak of the novel strain of coronavirus, specifically identified as 'COVID-19', has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposing quarantine period and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown currently, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Corporation and its operating subsidiaries in future period. There has been little direct impact on Kingsview with respect to COVID-19 as the Company has not been carrying out a lot of field work at this time. However, we are monitoring the situation and adding additional lead time to all requests as necessary.
