

Breakthrough Discovery: AccuTOX(TM) Effectively Kills Cancer Cells by Directly Eliciting DNA Damage

Vancouver, British Columbia--(Newsfile Corp. - August 2, 2022) - Defence Therapeutics Inc. (CSE: DTC) (FSE: DTC) (OTC Pink: DTCFF) ("**Defence**" or the "**Company**"), a Canadian biopharmaceutical company specialized in the development of immune-oncology vaccines and drug delivery technologies, is pleased to report the discovery of a novel DNA damaging function triggered by one of its lead compounds AccuTOX™, which effectively elicits cell death in cancer cells.

Cancer can be generally described as a state of uncontrolled cell proliferation. This is mainly due to losses in the ability of a given cell to activate its own cell death via a specific set of proteins known to sense unusual activities. Although it is difficult to reactivate these specific pathways to elicit cancer cell death, AccuTOX™ can address this.

Defence previously reported (see press release of June 22, 2021) the discovery of an Accum™ variant, AccuTOX™, capable of controlling cancer growth when injected directly in tumors. The use of AccuTOX™ in combination with multiple immune-checkpoints results in a survival rate between 60% and 100%, based on the pre-clinical tumor models studies in mice. The mode of action of AccuTOX™ approached is a non-biased transcriptomic application and revealed that the compound impairs several crucial pathways including DNA replication, cell division, nuclear integrity, and multiple modifications affecting DNA activity. The accumulation of exhaustive cell repair mechanisms triggered by AccuTOX™ combined to the build-up of misfolded proteins and generation of free radicals induce irreversible DNA damages leading to a general collapse in several cellular pathways resulting in effective cancer cell death.

"Defence's breakthrough discovery with its AccuTOX™ formulation as a novel potent small molecule capable of killing cancer cells is a significant advancement and development for oncology cancer treatment applications with Accum™. Discovering that AccuTOX™ can behave as a chemotherapeutic agent targeting the DNA of cancer cells and an immune-checkpoint inhibitor booster is a new discovery that is highly valuable to Defence's pipeline and future potential developments. The AccuTOX™ presents a novel discovery as a platform for targeting multiple cancers. This novel discovery creates significant values and applications to our Antibody Drug Conjugate ("ADC") pipeline. Results are convincing that AccuTOX™ is the perfect potent small molecule to use in the development of our own ADC," says Mr. Plouffe, the CEO of Defence Therapeutics.

Defence is currently conducting GLP studies on AccuTOX™ prior to initiate a Phase I trial in North America.

About Defence:

Defence Therapeutics is a publicly-traded biotechnology company working on engineering the next generation vaccines and ADC products using its proprietary platform. The core of Defence Therapeutics platform is the ACCUM™ technology, which enables precision delivery of vaccine antigens or ADCs in their intact form to target cells. As a result, increased efficacy and potency can be reached against catastrophic illness such as cancer and infectious diseases.

Cautionary Statement Regarding "Forward-Looking" Information

This release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address events or developments that the Company expects to occur, are forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include regulatory actions, market prices, and continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. Except as required by applicable securities laws, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.

Neither the CSE nor its market regulator, as that term is defined in the policies of the CSE, accepts responsibility for the adequacy or accuracy of this release.
