About Element79 Gold

Element79 Gold is a mining company focused on the acquisition, exploration and development of mining properties for gold and associated metals. Element79 Gold has acquired its flagship Maverick Springs Project ("Maverick Springs") between the Elko and White Pine Counties in Nevada, USA and recently completed an 43-101-compliant, pit-constrained mineral resource estimate (MRE) on the flagship Maverick Springs project located in the famous gold mining district of northeastern Nevada. The acquisition of Maverick Springs also included a portfolio of 15 properties along the Battle Mountain trend in Nevada and is completing analysis on these properties for further merit of exploration, along with the potential for sale or spin-out. The Company has recently acquired two previously-producing high-grade Au-Ag mines in Peru. The Company's management, exploration and operations teams have completed their due diligence trip to Peru to review these assets and establish its in-country Operations team. The intent of this asset purchase is to bring on production and generate cash flow from these assets within 24 months from their acquisition, anticipated in June 2022. In British Columbia, the Company has executed a Letter of Intent to acquire a private company which holds the option to 100% interest of the Snowbird High-Grade Gold Project, which consists of 10 mineral claims located in Central British Columbia, approximately 20km west of Fort St. James. The Company also has an option to acquire 100% interest in the Dale Property which consists of 90 unpatented mining

claims located approximately 100 km southwest of Timmins, Ontario, Canada in the Timmins Mining Division, Dale Township.
