### **About Element79 Gold**

Element79 Gold is a mining company focused on gold, silver and associated metals. Element79 Gold's main focus is on two core properties: developing its previously-producing, high-grade gold and silver mine, the Lucero project located in Arequipa, Peru, with the intent to bring it back into production in the near term; and its flagship Maverick Springs Project located in the famous gold mining district of northeastern Nevada, USA, between the Elko and White Pine Counties. Maverick Springs hosts a 43-101-compliant, pit-constrained mineral resource estimate reflecting an inferred resource of 3.71 million ounces of gold equivalent "AuEq" at a grade of 0.92 g/t AuEq (0.34 g/t Au and 43.4 g/t Ag) with an effective date of Oct. 19, 2022 (see news release October 20, 2022, available on SEDAR). The acquisition of the Maverick Springs Project also included a portfolio of 15 properties along the Battle Mountain trend in Nevada, which are non-core to its primary business focus. In British Columbia, Element79 Gold has executed a Letter of Intent and funded a drilling program to acquire a private company which holds the option to 100% interest of the Snowbird High-Grade Gold Project, which consists of 10 mineral claims located in Central British Columbia, approximately 20km west of Fort St. James. The Company also has an option to acquire a 100% interest in the Dale Property, 90 unpatented mining claims located approximately 100 km southwest of Timmins, Ontario, Canada in the Timmins Mining Division, Dale Township. The Company is analyzing the

non-core Nevada projects, The Dale Property and Snowbird Property for further merit of exploration, sale or spin-out. For more information about the Company, please visit [www.element79.gold](http://www.element79.gold)
