## About Tryp Therapeutics:

Tryp Therapeutics is a pharmaceutical company focused on developing compounds with known activity and/or safety profiles for the treatment of rare diseases and other diseases with high unmet medical needs. Tryp's psilocybin-for-neuropsychiatric disorders, or PFN™, program is focused on the development of synthetic psilocybin as a new class of drug for the treatment of certain neuropsychiatric-based disorders.

Tryp's lead PFN™ drug candidate is TRP-8802 for the treatment of fibromyalgia, a chronic pain syndrome estimated to affect more than 5 million people in the United States.

In addition to its PFN™ Program, Tryp is developing TRP-1001, an oral formulation of razoxane for the treatment of soft tissue sarcoma. Soft tissue sarcomas are a rare and diverse group of tumors that account for about 1% of all cancers in adults and 7% in children. Based on the prevalence of soft tissue sarcomas in the United States, Tryp believes it is a rare disease and that TRP-1001 should qualify for Orphan Drug status.
