

Heritage Mining Zone 3 Successful SGH Soil Survey

VANCOUVER, BC, July 25, 2024 – Heritage Mining Ltd. (CSE: HML FRA:Y66) (“**Heritage**” or the “**Company**”) is pleased to announce that the Zone 3 Spatiotemporal Geochemical Hydrocarbon survey “SGH Soils” report has been received and are very encouraging. The Company also has updated the drill program to focus on Zone 3 with historical confirmation drilling and SGH soil target testing.

Highlights:

- **The Zone 3 SGH analysis suggest stronger gold anomalies when compared to the SGH orientation survey at Alcona (Figure 1,2,3,4)**
- **Drill program updated to focus on Zone 3 historical and SGH Anomalies (Figure 4)**
- **Zone 10 SGH results pending**

“The Zone 3 results from the SGH survey are very encouraging in relation to Alcona and therefore support evaluating SGH anomalies with diamond drilling at Zone 3. Drilling to commence in short order. Drill pads and waterline trail have been completed. We look forward to updating the market on further developments of our program in the very near future.” Commented Peter Schloo, President CEO and Director of Heritage.

Qualified Person

Mitch Lavery P. Geo, Strategic Advisor for the Company, serves as a qualified person as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects and has reviewed the scientific and technical information in this news release, approving the disclosure herein.

ABOUT HERITAGE MINING LTD.

The Company is a Canadian mineral exploration company advancing its two high grade gold-silver-copper projects in Northwestern Ontario. The Drayton-Black Lake, Contact Bay and Scattergood projects are located near Sioux Lookout in the underexplored Eagle-Wabigoon-Manitou Greenstone Belt. The projects benefit from a wealth of historic data, excellent site access and logistical support from the local community. The Company is well capitalized, with a tight capital structure.
