Each Unit is comprised of one common share in the capital of the Company and one common share purchase warrant. Each common share purchase warrant will entitle the holder thereof to acquire one common share at a price of \$0.15 for a period of two years from the date of issuance.

On September 23, 2024, the Company issued 350,000 units (each a “Unit”) at a price of \$0.095 per unit for gross proceeds of \$33,250 pursuant to a non-brokered private placement. Each Unit is comprised of one common share in the capital of the Company and one common share purchase warrant. Each common share purchase warrant will entitle the holder thereof to acquire one common share at a price of \$0.15 for a period of two years from the date of issuance.

## **TRENDS AND INVESTMENT STRATEGY**

The Company is actively pursuing asset purchases and investment opportunities in high revenue growth businesses. Specifically, the Company will look for diversified exposure to expansion-stage companies with ESG values (environmental, social and governance) and their associated brands, in key categories related to the ocean economy with specific focus on mining, functional

For the nine months ended September 30, 2024, the Company recorded a net loss of \$455,189 (2023 - \$471,797). The decrease in net loss is a result of cost cutting measures put in place by management to preserve cash. Some of the significant changes to operations are as follows:

- Professional fees decreased to \$68,931 (2023 - \$163,252). The Company had engaged lawyers and professionals to assist with ongoing investment opportunities and other regulatory filings during prior period.
- The Company incurred advertising and promotions fees of \$Nil (2023 - \$75,004) in relation to marketing efforts to increase investor awareness through press releases. During the period ended September 30, 2024, the Company eliminated marketing efforts to preserve cash.
- Management fees decreased to \$36,750 (2023 - \$56,675). The decrease relates to changes on the Company’s management which resulted in lessor management fees during the current period compared prior period.
- Consulting fees increased to \$166,470 (2023 - \$70,375). There was a significant decrease with engagements with consultants during the prior period. During the current period, the Company engaged more consultants.
- Share-based compensation increased to \$76,670 (2023 - \$1,279). The increase was the result of options granted to arm’s-length consultants for business development and advisory services in the current period compared to Nil options granted in the prior period.

**For the nine months ended September 30, 2024 and 2023**

For the three months ended September 30, 2024, the Company recorded a net loss of \$254,203 (2023 - \$286,957). The decrease in net loss is a result of cost cutting measures put in place by management to preserve cash. Some of the significant changes to operations are as follows:

- Professional fees decreased to \$58,295 (2023 - \$122,014). The Company had engaged lawyers and professionals to assist with ongoing investment opportunities and other regulatory filings during prior period.
- The Company incurred advertising and promotions fees of \$Nil (2023 - \$25,278) in relation to marketing efforts to increase investor awareness through press releases. During the period ended September 30, 2024, the Company eliminated marketing efforts to preserve cash.
- Management fees decreased to \$12,525 (2023 - \$33,200). The decrease relates to changes on the Company’s management which resulted in lessor management fees during the current period compared prior period.
- Office and miscellaneous fees decreased to \$24,403 (2023 - \$53,299). Office and miscellaneous fees include admin fees, interest expense, rent expense, and travel expenses. The decrease primarily relates to rent expenses in the prior period which were eliminated in the current period as a result of cost cutting measures put in place to preserve cash.

**SUMMARY OF QUARTERLY RESULTS**

The table below presents selected financial data for the Company’s eight most recently completed quarters, all prepared in accordance with IFRS.

	<b>September 30, 2024</b>	<b>June 30, 2024</b>	<b>March 31, 2024</b>	<b>December 31, 2023</b>
	\$	\$	\$	\$
Net loss	254,203	133,329	67,657	3,409,303
Basic and diluted loss per share	(0.04)	(0.03)	(0.02)	(1.05)
Total Assets	301,593	452,287	302,952	296,989

  

	<b>September 30, 2023</b>	<b>June 30, 2023</b>	<b>March 31, 2023</b>	<b>December 31, 2022</b>
	\$	\$	\$	\$
Net loss	286,957	198,859	184,840	10,534,448
Basic and diluted loss per share	(0.09)	(0.06)	(0.07)	(8.09)
Total Assets	3,908,282	3,862,954	3,842,660	2,228,024

During Q4 2023 (December 31, 2023) and Q4 2022 (December 31, 2022), the significant increase in net losses were due to fair value loss on various investments, consulting expenses, and share based compensation.

In Q1 2024 (March 31, 2024) and Q2 2024 (June 30, 2024), net loss decreased significantly as management implemented cutting cost measures in efforts to preserve cash.

There are no general trends regarding the Company’s quarterly results and the Company’s business is not seasonal, as it can develop and progress on a year-round basis (funding permitting). Quarterly results may vary significantly depending mainly on whether the Company has engaged in new activities or abandoned any projects and these factors which may account for material variations in the Company’s quarterly net income (losses) are not predictable.

**LIQUIDITY AND CAPITAL RESOURCES**

The financial statements have been prepared on a going-concern basis, which assumes the realization of assets and liquidation of liabilities in the normal course of business. Continuing operations, as intended, are dependent on management’s ability to raise required funding through future equity issuances, its ability to acquire resource property or business interests and develop profitable operations or a combination thereof, which is not assured, given today’s volatile and uncertain financial markets. The Company may revise programs depending on its working capital position.

As at September 30, 2024, the Company had a working capital deficiency of \$370,793 (December 31, 2023 - \$735,221) which primarily consisted of cash of \$26,227 (December 31, 2023 - \$6,623), prepaid expenses of \$3,486 (December 31, 2023 - \$18,486).

**Goat Industries Ltd. (formerly. Billy Goat Brands Ltd.)

accounts payable and accrued liabilities of \$375,506 (December 31, 2023 - \$419,465) and loans payable of \$25,000 (December 31, 2023 - \$340,865).

During the period ended September 30, 2024, cash used in operating activities were \$370,178 (2023 - \$316,444). Cash used in operating activities consisted of net losses and cash used to pay accounts payable and prepaid expenses. Please refer to results of operation for details.

During the period ended September 30, 2024, cash provided by financing activities was \$389,782 (2023 - \$415,000). This mainly consists of funds received from the issuance of shares of \$344,410 (2023 - \$Nil), funds received from the issuance of special warrants of \$Nil (2023 - \$215,000) and funds received from lenders (net of repayments) of \$45,372 (2023 - \$100,000).

Other than the above-mentioned current liabilities, the Company has no short-term capital spending requirements and future plans and expectations are based on the assumption that the Company will realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. There can be no assurance that the Company will be able to obtain adequate financing in the future or if available that such financing will be on acceptable terms. If adequate financing is not available when required, the Company may be required to delay, scale back or eliminate various programs and may be unable to continue in operation. The Company may seek such additional financing through debt or equity offerings. Any equity offering will result in dilution to the ownership interests of the Company’s shareholders and may result in dilution to the value of such interests.

**OUTSTANDING SHARE DATA**

At the date of this report, the Company has 8,394,741 shares, 800,000 stock options, 86,000 special warrants, 112,000 finders’ warrants and 5,486,311 warrants outstanding.

**OFF STATEMENT OF FINANCIAL POSITION ARRANGEMENTS**

At the date of this report, the Company had no material off statement of financial position arrangements such as guarantee contracts, contingent interest in assets transferred to an entity, derivative instruments obligations or any obligations that trigger financing, liquidity, market or credit risk to the Company.

**SIGNIFICANT ESTIMATES AND ASSUMPTIONS**

The preparation of the Company's financial statements in conformity with IFRS requires management to make judgments, estimates, and assumptions that affect the reported amount of net assets, liabilities, and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reported period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Estimates and assumptions where there is significant risk of material adjustments to assets and liabilities in future accounting periods include the amortization of equipment, recoverability of the carrying value of exploration and evaluation assets, fair value measurements for, reserves and accumulated depletion, financial instruments and stock-based compensation and other equity-based payments, and the recoverability of deferred tax assets. Actual results may differ from those estimates and judgments.

The preparation of financial statements in accordance with IFRS requires the Company to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgement applied in preparing the Company's financial statements is the assessment of the Company's ability to continue as a going concern.

**PROPOSED TRANSACTIONS**

There are currently no significant proposed transactions, other than what is disclosed elsewhere in the MD&A.

**FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

**Credit risk**

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its payment obligations. The Company's exposure to credit risk is limited to its cash balances. The risk exposure is limited to the carrying amounts at the statement of financial position dates.

The Company's cash balances are held in accounts at a major Canadian financial institution. The credit risk associated with cash is mitigated, as cash is held at major institutions with high credit ratings.

**Liquidity risk**

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles most of its financial obligations with cash. The ability to do this relies on the Company raising equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs. The Company is exposed to liquidity risk.

As at September 30, 2024, the Company had a cash balance of \$26,227 (2023 - \$100,339) to settle current liabilities of \$400,506 (2023 - \$663,461), which are due within 12 months.

**Foreign exchange risk**

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company has foreign currency exposure on the investments in Sophie's Kitchen due to the differences in currencies.

The Company has not entered into any foreign currency contracts to mitigate this risk.

**Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Interest rate risk consists of two components:

- a) To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk; and

**Goat Industries Ltd. (formerly. Billy Goat Brands Ltd.)  
Management's Discussion and Analysis  
For the nine months ended September 30, 2024 and 2023**

- b) To the extent that changes in prevailing market rates differ from the interest rate in the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

Current financial assets and financial liabilities are generally not exposed to interest rate cash flow risk due to their short-term nature and maturity.

**Management of capital**

The Company's policy is to maintain a strong capital base so as to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Company consists of equity and cash. There were no changes in the Company's approach to capital management during the period. The Company is not subject to any externally imposed capital requirements.

**CONTINGENCIES**

The Company is not aware of any contingencies or pending legal proceedings as of September 30, 2024 and as of the date of this report.

**RISK FACTORS**

The following are certain risk factors relating to the business carried on by the Company that prospective holders of Shares should carefully consider.

**Early Stage**

The Company's present business is at an early stage. As such, the Company is subject to many risks including under-capitalization, cash shortages, and limitations with respect to personnel, financial and other resources and the lack of revenue. There is no assurance that the Company will be successful in achieving a return on shareholders' investment and the likelihood of success must be considered in light of its early stage of operations. The Company currently has no source of revenue and expects to obtain financing in the future primarily through further equity and/or debt financing. While it has been successful in obtaining financing in the past, there is no guarantee that the Company will be successful now, or in the future. Failure to raise additional financing on a timely basis could cause the Company to eventually suspend its operations.

**No Profits to Date**

The Company has not made profits since its incorporation and it may not be profitable for the foreseeable future. Its future profitability will, in particular, depend upon the timing of the realization or disposition of the Company's investments. Because of the limited operating history and the uncertainties surrounding the Company's investments, management does not believe that the operating results to date should be regarded as indicators for the Company's future performance.

**Going Concern Assumption**

The financial statements of the Company have been prepared in accordance with IFRS on a going concern basis, which presumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company's continuation as a "going concern" is uncertain and is dependent upon, amongst other things, attaining a satisfactory revenue level, the support of its customers, its ability to continue profitable operations, the generation of cash from operations, and its ability to obtain financing arrangements and capital in the future. These material uncertainties represent risks to the Company's ability to continue as a going concern and realize its assets and pay its liabilities as they become due. If the "going concern" assumption was not appropriate for the financial statements, then adjustments would be necessary to the carrying values of assets and liabilities, the reported expenses and the balance sheet classifications used. Such adjustments could be material.

**Additional Requirements for Capital**

Substantial additional financing may be required if the Company is to successfully develop its business. No assurances can be given that the Company will be able to raise the additional capital that it may require for its anticipated future development. Any additional equity financing may be dilutive to investors and debt financing, if available, may involve restrictions on financing and operating activities. There is no assurance that additional financing will be available on terms acceptable to the Company, if at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations or anticipated expansion.

**Expenses May Not Align With Revenues**

**Goat Industries Ltd. (formerly. Billy Goat Brands Ltd.)  
Management's Discussion and Analysis  
For the nine months ended September 30, 2024 and 2023**

Unexpected events may materially harm the Company's ability to align incurred expenses with recognized revenues. The Company incurs operating expenses based upon anticipated revenue trends. Since a high percentage of these expenses may be relatively fixed, a delay in recognizing revenues from transactions related to these expenses (such a delay may be due to the factors described elsewhere in this risk factor section or it may be due to other factors) could cause significant variations in operating results from quarter to quarter, and such a delay could materially reduce operating income. If these expenses are not subsequently matched by revenues, the Company's business, financial condition, or results of operations could be materially and adversely affected.

**Market Acceptance**

The growth of the Company's investments in part depends on their ability to develop and market new products and improvements to their existing products that appeal to consumer preferences. The success of an investee company's innovation and product development efforts is affected by its ability to anticipate changes in consumer preferences, the technical capability of its research and development team in developing and testing product prototypes, including complying with applicable governmental regulations, the success of its management and sales and marketing team in introducing and marketing new products and positive acceptance by consumers. Failure to develop, successfully market and sell new products may inhibit an investee company's growth, sales and profitability, which may have a material adverse effect on the Company's investment.

**Global Financial Developments**

Stress in the global financial system may adversely affect the Company's finances and operations in ways that may be hard to predict or to defend against. Financial developments seemingly unrelated to the Company or to its industry may adversely affect the Company over the course of time. For example, material increases in any applicable interest rate benchmarks may increase the debt payment costs for any credit facilities. Credit contraction in financial markets may hurt its ability to access credit in the event that the Company identifies an acquisition opportunity or require significant access to credit for other reasons. A reduction in credit, combined with reduced economic activity, may adversely affect business. Any of these events, or any other events caused by turmoil in 36 world financial markets, may have a material adverse effect on the Company business, operating results, and financial condition.

**Regulatory Risks**

Various aspects of the Company's business and/or investments are subject to laws of the jurisdictions in which they operate. The impact of applicable governmental legislative and compliance regime and any delays in obtaining, or failure to obtain, regulatory approvals could significantly delay or impact the development of markets, products and sales initiatives and could have a material adverse effect on the business, results of operations and financial condition of the Company and/or its investments.

**Dependence on Third Party Relationships**

The Company is highly dependent on a number of third-party relationships to conduct its business and implement expansion plans. It cannot be assured that all of these partnerships will turn out to be as advantageous as currently anticipated or that other partnerships would not have proven to be more advantageous. In addition, it is impossible to assure that all associated partners will perform their obligations as agreed.

**Economic Conditions**

Current and future unfavourable economic conditions could negatively impact the Company's financial viability. Unfavourable economic conditions could also increase the Company's financing costs, decrease net income or increase net loss, limit access to capital markets and negatively impact any of the availability of credit facilities to the Company.

**Failure to Grow at the Rate Anticipated**

The Company is a start-up company with no history of sales or profitability. If the Company is unable to achieve adequate revenue growth, its ability to become profitable may be adversely affected and the Company may not have adequate resources to execute its business strategy.

**Management of Growth**

The Company may be subject to growth-related risks including pressure on its internal systems and controls. The Company's ability to manage its growth effectively will require it to continue to implement and improve its operational and financial systems. The inability of the Company to deal with this growth could have a material adverse impact on its business, operations and prospects. While management believes that it will have made the necessary investments in infrastructure to process anticipated volume increases in the short term, the Company may experience growth in the number of its employees and the scope of its operating and

**Goat Industries Ltd. (formerly. Billy Goat Brands Ltd.)

For the nine months ended September 30, 2024 and 2023**

financial systems, resulting in increased responsibilities for the Company's personnel, the hiring of additional personnel and, in general, higher levels of operating expenses. In order to manage its current operations and any future growth effectively, the Company will also need to continue to implement and improve its operational, financial and management information systems and to hire, train, motivate and manage its employees. There can be no assurance that the Company will be able to manage such growth effectively, that its management, personnel or systems will be adequate to support the Company's operations or that the Company will be able to achieve the increased levels of revenue commensurate with the increased levels of operating expenses associated with this growth.

**Litigation**

The Company may become involved in litigation that may materially adversely affect it. From time to time in the ordinary course of the Company business, it may become involved in various legal proceedings. Such matters can be time-consuming, divert management's attention and resources and cause the Company to incur significant expenses. Furthermore, because litigation is inherently unpredictable, the results of any such actions may have a material adverse effect on the Company's business, operating results or financial condition. More specifically, the Company may face claims relating to information that is retrieved from or transmitted over the Internet or through the solution and claims related to the Company's products. In particular, the nature of the Company's business exposes it to claims related to intellectual property rights, rights of privacy, and personal injury torts. Furthermore, there is no assurance that any liability incurred as a result of litigation can be recovered from the Company's insurance policy.

**Conflicts of interest**

The directors of the Company are required by law to act honestly and in good faith with a view to the best interests of the Company and to disclose any interests, which they may have in any project or opportunity of the Company. If a conflict of interest arises at a meeting of the board of directors, any director in a conflict will disclose his interest and abstain from voting on such matter. Conflicts, if any, will be subject to the procedures and remedies as provided under the BCBCA. To the best of the Company's knowledge, and other than disclosed herein, there are no known existing or potential conflicts of interest between the Company and its directors and officers except that certain of the directors and officers may serve as directors and/or officers of other companies, and therefore it is possible that a conflict may arise between their duties to the Company and their duties as a director or officer of such other companies.

**Difficulty to Forecast**

The Company must rely largely on its own market research to forecast sales as detailed forecasts are not generally obtainable from other sources at this early stage of the functional foods, plant-based proteins and health and wellness industries as well as the minin industry. A failure in the demand for its products to materialize as a result of competition, technological change or other factors could have a material adverse effect on the business, results of operations and financial condition of the Company.

**Internal Controls**

Effective internal controls are necessary for the Company to provide reliable financial reports and to help prevent fraud. Although the Company will undertake a number of procedures and will implement a number of safeguards, in each case, in order to help ensure the reliability of its financial reports, including those imposed on the Company under Canadian securities law, the Company cannot be certain that such measures will ensure that the Company will maintain adequate control over financial processes and reporting. Failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm the Company's results of operations or cause it to fail to meet its reporting obligations. If the Company or its auditors discover a material weakness, the disclosure of that fact, even if quickly remedied, could reduce the market's confidence in the Company's financial statements and materially adversely affect the trading price of the Company's Shares.

**COVID-19**

The outbreak of the coronavirus ("COVID-19") pandemic has impacted the Company's plans and activities. The Company may face disruption to operations, supply chain delays, travel and trade restrictions and impact on economic activity in affected countries or regions can be expected and can be difficult to quantify. Such pandemics or diseases represent a serious threat to maintaining a skilled workforce industry and could be a major health-care challenge for the Company. There can be no assurance that the Company's personnel will not be impacted by these pandemic diseases and ultimately that the Company would see its workforce productivity reduced or incur increased medical costs/insurance premiums as a result of these health risks. In addition, the COVID-19 pandemic has created a dramatic slowdown in the global economy. The duration of the COVID-19 outbreak and the resultant travel restrictions, social distancing, Government response actions, business closures and business disruptions, can all have an impact on the Company's operations and access to capital. There can be no assurance that the Company will not be impacted by adverse consequences that may be brought about by the COVID-19 pandemic on global financial markets may reduce resource prices, share prices and financial liquidity and thereby that may severely limit the financing capital available.
