(FORMERLY ZOGLO'S INCREDIBLE FOOD CORP)

Management Discussion & Analysis
December 31, 2023

Credit risk

Credit risk is the risk of loss associated with the counterparty's inability to fulfill its payment obligations. The Company believes it has significant credit risk. The Company is exposed to credit risk from its operating activities (primarily trade and other receivables) and from its financing activities, including cash and short term investments with banks and financial institutions and advances to suppliers.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. The Company achieves this by seeking debt and equity financing when needed. Liquidity risk is considered as high.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

(a) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in the market interest rates. The Company's cash is held in an account with a major Canadian financial institution. The funds may be withdrawn at any time without penalty. There have been no significant impacts on the Company's consolidated statements of loss and comprehensive loss from changes in interest rates.

(b) Foreign currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company is exposed to currency risk to the extent that there is a mismatch between the currencies in which purchases are denominated and the functional currency of the Company. The functional currency of the Company is the Canadian dollar. The currency in which purchase transactions are denominated is US dollar. The Company does not currently hedge its currency risk, and is therefore subject to gains or losses due to fluctuations in that currency. In 2023, the Company's exposure to foreign currency changes for all other currencies was not material.

(c) Price risk

The Company is exposed to price risk with respect to equity prices. Equity price risk is defined as the potentially adverse impact on the Company's ability to obtain equity financing due to movements in individual equity prices. The Company closely monitors individual equity movements to determine the appropriate course of action to be taken by the Company.
