

US Senate Passes Sweeping Climate Change Bill

Calgary, Alberta – August 10, 2022 - Delta CleanTech Inc. (“**Delta**” or the “**Company**”) (CSE:DELTA, FRA: 66C, OTCQB:DCTIF) celebrates the announcement that the United States (“US”) Senate has passed the Climate Change Bill (“Bill”).

The United States Senate made a landmark decision yesterday by approving the \$370 billion legislation. After more than one year of negotiating and amendments, the Bill will replace the “Build Better Back” previous legislation that was introduced last year, but never passed Senate approval.

Asked to comment, Mr. Jeff Allison, President of Delta stated: “Delta is currently receiving an unprecedented amount of new business opportunities in Canada as a result of Canada’s Federal Government’s commitment to carbon taxes and carbon incentives to reduce CO₂ emissions. We recently commenced three new projects, the details of which we will formally announce in the near future. With the passing of this Bill, the US will become a major source of new business opportunities for Delta. We already have a number of new projects we are evaluating in the US. This new Bill in conjunction with the existing and proposed amendments to the [45Q tax incentives](#) in the US, will indeed accelerate opportunities for Delta over the next few years.”

Mr. Allison continues to share, “The Delta engineering team is currently working at full capacity, and Delta has recently added additional engineering capabilities to meet the increasing demand that is occurring. Delta’s last two quarters of their fiscal year should begin to reflect the new projects recently obtained.”

About Delta CleanTech Inc.

[Delta CleanTech Inc.](#) is a 15-year ESG-driven, recognized global technology leader in CO₂ Capture, Decarbonization of Energy, Solvent & Glycol Reclamation, Blue Hydrogen Production, and Carbon Credit Aggregation and Management. Delta continues to provide solutions to clients all over the world in sequestering, capturing, and reducing CO₂ and through its Carbon RX wholly owned subsidiary is originating, validating, digitizing, and streaming Carbon Credits.
