## Nevada Lithium to Participate in the “2025 Mining Conference: Mining and Supplying Critical Minerals & Precious Metals”

**Vancouver, British Columbia** – January 13, 2025 – Nevada Lithium Resources Inc. (“**Nevada Lithium**” or the “**Company**”) (TSXV: NVLH; OTCQB: NVLHF; FSE: 87K) announced today that the Company CEO, Stephen Rentschler, has been invited to present at the “2025 Mining Conference: Mining & Supplying Critical Minerals & Precious Metals”, presented by Maxim Group LLC, on Thursday, January 16th, 2025, starting at 9:00 a.m. ET. Nevada Lithium is currently developing its 100% owned Bonnie Claire Lithium Project, located in Nye County Nevada. Bonnie Claire is amongst the largest lithium resources in the world.

During the “2025 Mining Conference: Mining & Supplying Critical Minerals & Precious Metals”, Tate Sullivan, Senior Research Analyst at Maxim Group, will host virtual conversations with companies to identify future trends in mining and supplying critical minerals and precious metals.

### **Nevada Lithium’s CEO, Stephen Rentschler will present January 16, 2025 at 1:30 pm ET.**

This conference will be live on M-Vest. To attend, sign up to become an M-Vest member.

**Click here to learn more and reserve your seat:** <https://m-vest.com/events/mining-01162025>

### About Nevada Lithium Resources Inc.

Nevada Lithium Resources Inc. is a mineral exploration and development company focused on shareholder value creation through its core asset, the Bonnie Claire Project, located in Nye County, Nevada, where it holds a 100% interest.

Resources for the Bonnie Claire deposit have been separated into two Zones; a Lower Zone (i.e., mineralization hosted by Lower Claystone and Lower Sandstone units) and an Upper Zone (i.e., mineralization hosted by an Upper Claystone unit). A very high-grade zone of Lithium and Boron in the Lower Zone remains open in 3 directions.

The Lower Zone gives an Indicated Resource of 275.85 million tonnes (Mt) at 3,519 ppm lithium (5.167 Mt LCE) and 275.85 Mt at 8,404 ppm Boron (2.318 Mt B), together with an Inferred Resource of 1,561.06 Mt at 3,085ppm Lithium (25.634 Mt LCE). This base-case resource is based on a 1,800ppm Lithium cutoff, constrained by Hydraulic Borehole Mining (HBHM) parameters, and an assumed 60% recovery of the host strata.<sup>1</sup>

The Upper Zone gives an Indicated Resource of 188.08 Mt at 1,074 ppm Lithium (1.075 Mt LCE) and 152.11 Mt at 1,519 ppm Boron (0.231 Mt B), together with an Inferred Resource of 451.10 Mt at 1,106 ppm Lithium (2.655 Mt LCE) and 270.53 Mt at 1,505 ppm Boron (0.407 Mt B). This resource is calculated at a 900 ppm Lithium cut-off, within a Constraining Pit Shell, and would be mined by conventional open-pit methods. <sup>1</sup>

## About Maxim Group LLC

Maxim Group LLC is a full-service investment banking, securities and wealth management firm headquartered in New York. The Firm provides a full array of financial services including investment banking; private wealth management; and global institutional equity, fixed-income and derivatives sales & trading, equity research and prime brokerage services. Maxim Group is a registered broker-dealer with the U.S. Securities and Exchange Commission (SEC) and the Municipal Securities Rulemaking Board (MSRB) and is a member of FINRA SIPC, and NASDAQ. To learn more about Maxim Group, visit [maximgrp.com](http://maximgrp.com)

## QP Disclosure

The technical information in the above disclosure has been reviewed and approved by the designated Qualified Person under National Instrument 43-101, Dr. Jeff Wilson, PhD, P.Geo, Vice President of Exploration for Nevada Lithium. Dr. Wilson is not independent of Nevada Lithium, as he is Vice President of Exploration for Nevada Lithium.

<sup>1</sup>See Mineral Resource Estimate (MRE) NI 43-101 Technical Report, Bonnie Claire Lithium Project, Nye Country, Nevada authored by Global Resource Engineering Ltd. dated December 16, 2014, with an effective date of September 24, 2024. The MRE was summarized in Nevada Lithium's news release dated November 12, 2024, and is available on Nevada Lithium's SEDAR+ profile at [www.sedarplus.ca](http://www.sedarplus.ca).

Mineral resources are not mineral reserves and do not have demonstrated economic viability. There is no certainty that all or any part of the mineral resources will be converted into mineral reserves. Inferred mineral resources are that part of a mineral resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. Geological evidence is sufficient to imply but not verify geological and grade or quality continuity. It is reasonably expected that the majority of inferred mineral resources could be upgraded to indicated mineral resources with continued exploration.

### Cautionary Note Regarding Forward-Looking Statements

This news release contains forward-looking statements and forward-looking information (collectively, "forward-looking statements") within the meaning of applicable Canadian securities legislation. These statements relate to matters that identify future events or future performance. Often, but not always, forward looking information can be identified by words such as "could", "pro forma", "plans", "expects", "may", "will", "should", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", "believes", "potential" or variations of such words including negative variations thereof, and phrases that refer to certain actions, events or results that may, could, would, might or will occur or be taken or achieved.

The forward-looking statements contained herein include, but are not limited to, statements regarding: the performance of the Bonnie Claire Project and results of the Company's plans for exploration and development at the Bonnie Claire Project (including, without limitation, its mineral resources, current claims and its ability to utilize global lithium needs); the performance of lithium as a commodity, including the sustained lithium demand and prices, and the performance of the Shares on the TSXV.

In making the forward looking statements in this news release, Nevada Lithium has applied several material assumptions, including without limitation: market fundamentals that result in sustained lithium demand and prices; the receipt of any necessary permits, licenses and regulatory approvals in connection with the future development of the Bonnie Claire Project in a timely manner; the availability of financing on suitable terms for the development; construction and continued operation of the Bonnie Claire Project; the Bonnie Claire Project containing mineral resources; Nevada Lithium's ability to comply with all applicable regulations and laws, including environmental, health and safety laws; and the Company's ability to satisfy the continued listing requirements of the TSXV.

Investors are cautioned that forward-looking statements are not based on historical facts but instead reflect Nevada Lithium's management's expectations, estimates or projections concerning future results or events based on the opinions, assumptions and estimates of managements considered reasonable at the date the statements are made. Although Nevada Lithium believes that the expectations reflected in such forward- looking statements are reasonable, such information involves risks and uncertainties, and under reliance should not be placed on such information, as unknown or unpredictable factors could have material adverse effects on future results, performance or achievements expressed or implied by Nevada Lithium. Among the key risk factors that could cause actual results to differ materially from those projected in the forward- looking statements are the following: operating and technical difficulties in connection with mineral exploration and development and mine development activities at the Bonnie Claire Project; estimation or realization of mineral reserves and mineral resources, requirements for additional capital; future prices of precious metals and lithium; changes in general economic, business and political conditions, including changes in the financial markets and in the demand and market price for commodities; possible variations in ore grade or recovery rates; possible failures of plants, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; delays or the inability of Nevada Lithium to obtain any necessary approvals, permits, consents or authorizations, financing or other planned activities; changes in laws, regulations and policies affecting mining operations; currency fluctuations, title disputes or claims limitations on insurance coverage and the timing and possible outcome of pending litigation, environmental issues and liabilities; risks relating to epidemics or pandemics such as COVID-19, including the impact of COVID-19 on Nevada Lithium's business; as well as those factors discussed under the heading "Risk Factors" in Nevada Lithium's latest Management Discussion and Analysis and other filings of Nevada Lithium filed with the Canadian securities authorities, copies of which can be found under Nevada Lithium's profile on the SEDAR+ at [www.sedarplus.com](http://www.sedarplus.com).

Should one or more of these risks or uncertainties materialized, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated, believed, estimated or expected. Although Nevada Lithium has attempted to identify important risks, uncertainties and factors which could cause actual results to differ materially, there may be others that cause results not to be as anticipated, estimated or intended. Nevada Lithium does not intend, and does not assume any obligation, to update this forward-looking information except as otherwise required by applicable law.
