Condensed Interim Statements of Cash Flow

For the Three Months Ended December 31, 2023 and 2022 In Canadian Dollars, unless noted (unaudited)

1. NATURE OF OPERATIONS

Traction Uranium Corp. (the "Company") was incorporated under the *BC Business Corporations Act* on July 20, 2020. On November 4, 2021, the Company changed its name from "Traction Exploration Inc." to "Traction Uranium Corp.". On September 1, 2021, the Company's common shares began trading on the Canadian Securities Exchange ("CSE") under the symbol "TRAC".

The principal business of the Company is the acquisition, exploration and evaluation of resource properties. The Company's corporate office and principal place of business is 100 – 521 3rd Avenue SW, Calgary, AB T2P 3T3.

These condensed interim financial statements (the "financial statements") were approved by the Board of Directors on February 29, 2024

2. GOING CONCERN

These financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due. During the period ended December 31, 2023, the Company incurred a net loss of \$1,331,135 (2022 - \$2,376,775) and as at that date, has an accumulated deficit of \$23,478,534 (September 30, 2023 - \$22,147,399). The Company has incurred losses since inception and has no current source of operating revenue and is accordingly dependent upon the receipt of equity on terms which are acceptable.

In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period.

These events and conditions indicate a material uncertainty which may cast significant doubt about the Company's ability to continue as a going concern. If for any reason, the Company is unable to continue as a going concern, this could result in adjustments to the amounts and classifications of assets and liabilities in the Company's financial statements and such adjustments could be material.

3. BASIS OF PRESENTATION

In these financial statements, unless otherwise indicated, all amounts are expressed in Canadian dollars, which is the Company's functional and presentation currency.

These financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34 Interim Financial Reporting using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). These financial statements are condensed as they do not include all of the information required by IFRS for annual financial statements and therefore should be read in conjunction with the Company's audited financial statements for the year ended September 30, 2023.

The financial statements have been prepared on a historical cost basis, except as detailed in the accounting policies disclosed in Note 4 of the Company's audited financial statements for the year ended September 30, 2023. All accounting policies, estimates and methods of computation followed in the preparation of these financials statements are consistent with those of the previous year.

4. RESTRICTED CASH

As at December 31, 2023, the Company classified \$10,000 (September 30, 2023 - \$10,000) as restricted cash. This amount is held as collateral for the Company's corporate credit cards and is invested in GICs at a rate of prime less 0.50%.

10. RISK MANAGEMENT

A) Financial Risk Management

The Company may be exposed to risks of varying degrees of significance which could affect its ability to achieve its strategic objectives. The main objectives of the Company's risk management processes are to ensure that risks are properly identified and that the capital base is adequate in relation to those risks. The principal risks to which the Company is exposed are described below.

I. Credit Risk

Credit risk is the risk that a counter party will be unable to pay any amounts owed to the Company. Management's assessment of the Company's exposure to credit risk on its \$2,284,350 in cash (September 30, 2023 - \$1,861,425) is low as the Company's cash is held with major Canadian financial institutions. The accounts receivable relates to GST receivable from the Canadian Revenue Agency.

II. Liquidity Risk

Liquidity risk is the risk that the Company is not able to meet its financial obligations as they fall due. As at December 31, 2023 the Company's working capital surplus is \$2,518,539 (September 30, 2023 - \$2,328,400), and it does not have any long-term monetary liabilities. The Company may seek additional financing through debt or equity offerings, but there can be no assurance that such financing will be available on terms acceptable to the Company or at all. Any equity offering will result in dilution to the ownership interests of the Company's shareholders and may result in dilution to the value of such interests.

The Company intends to seek additional financing to better manage its liquidity risk to ensure it will have sufficient liquidity to meet its current and future liabilities.

III. Market Risk

Market risk incorporates a range of risks. Movements in risk factors, such as market price risk, affect the fair values of financial assets and liabilities. The Company is not exposed to these risks.

IV. Currency Risk

The operating results and financial position of the Company are reported in Canadian dollars. The Company has limited exposure to these risks.

B) Fair Values

The carrying values of cash, accounts payable and accrued liabilities and loan payable approximate their fair values due to their short-term to maturity.

Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Quoted prices in markets that are not active, or inputs that are not observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

B) Capital Management

The Company considers its shareholders' equity as capital. The Company's objectives when maintaining capital are to maintain a sufficient capital base in order to satisfy its capital obligations and ongoing operational expenses, and at the same time preserve investor's confidence required to sustain future development and production of the business.

The Company manages its capital structure and makes adjustments as necessary in light of economic conditions. The Company, upon approval from its Board of Directors, intends to balance its overall capital structure through new share issues or by undertaking other activities as deemed appropriate under the specific circumstances. To maintain its capital structure the Company may, from time to time, issue equity or debt, repay debt or sell assets.
