About Advanced Gold Exploration Inc.

In light of our recent name change Advanced Gold Exploration is focusing our attention on gold. We believe that the future of gold is strong, and we will be part of that future. We are bringing an entirely different approach to the mining industry. We don’t want to mine but rather, we’ve acquired a portfolio of undervalued gold properties and are increasing their value through the application of modern technology. We have a growing pipeline of similar properties that we are looking to acquire.

We are involved exclusively in the acquisition and advancement of past projects – with no intent to bring them back into production ourselves. That we will leave to others who are expert in these areas. Our expertise is in identifying and acquiring undervalued properties with significant historical work, which were uneconomic at the time, but we believe have economic value at today’s prices.

We fund the development of re-working historic data and applying modern technology to underwrite new qualified reports, document quantifiable resources and reserves to current standards, thereby recognizing and realizing the current value.

Our purpose is to bring immediate and long-term value to our partners and shareholders while seeking to reduce risk by working with experts.
