SCHEDULE B

NET SMELTER RETURN ROYALTY

1. For the purpose of this Schedule, capitalized terms not defined herein have the meanings set out in the Agreement to which this schedule is attached, and:

“Commencement of Commercial Production” means the first business day after the Property has been in Commercial Production for at least 30 consecutive days.

“Commercial Production” means the operation of the Property, or any portion thereof, as a producing mine and the production of Products therefrom (excluding bulk sampling, pilot plant or test operations).

“net smelter return royalty” means all monies realized and actually received by the Optionee and any successors and assigns on the sale of any Products mined or extracted from the Property as evidenced by its returns or settlement sheets, including any premiums, bonuses and subsidies, less, if any such ores or minerals require smelting or other processing, all monies paid or payable on account of:

- (a) loading and transporting of the ores or minerals from the Property to the smelter or other purchaser;
- (b) smelter treatment charges or other charges levied by the purchaser;
- (c) freight allowance and severance taxes or royalties that may be paid to governmental bodies;
- (d) insurance and security costs and charges;
- (e) out of pocket marketing costs and commissions payable to unaffiliated third parties; and
- (f) penalties and other deductions whatsoever paid or payable in relation to the sale of the ores or minerals.

For greater clarity:

- (a) in calculating the net smelter returns royalty there shall not be deducted any charges or costs related to the mining, ore hauling, milling or solution extraction and precipitation (whether on site or at a custom mill) or production of product resulting from the minerals, metals or concentrates;
- (b) monies realized for Products taken in kind will be deemed to be equal to the average price(s) or quotation(s) for such Products for the month of sale or taking as may be reported in such publication or source generally recognized in the mining industry as reflecting the price(s) or quotation(s) at which such Products are currently being offered for sale and purchase; and

- (c) if Products from the Property are commingled with ore and minerals from other properties, the Optionee and any successors and assigns will establish procedures, in accordance with accepted mining and metallurgical techniques, for determining the proportional amount of the total recoverable metal content in the commingled minerals attributable to the input from each of the properties by calculating the same on a metallurgical basis in accordance with sampling schedules and mining efficiency experience so that the Royalty may reasonably be determined.

“**Product**” means all ore and concentrates and other products derived from the Property.

“**Royalty**” means a 3.5% net smelter return royalty with a right for the Optionee to purchase 1.5% of the net smelter return royalty at anytime and at its election for a price of \$10,000,000 while the Optionee maintains the Option Agreement in good standing.

“**Year**” means the fiscal year established by the Optionee.

2. The Royalty shall accrue for each calendar quarter following the date of Commencement of Commercial Production and shall be paid to the Optionor within 30 days after receipt of proceeds by the Optionee while the Property is in Commercial Production and delivered to the address provided in the Agreement, or such other address as may be specified in writing by the Optionor.
3. Within 90 days after the end of each Year during which the Property is in Commercial Production, the records relating to the calculation of the Royalty during that Year will be audited. The audited statements will be delivered to the Optionor, who will have 60 days after receipt of such statements to question in writing their accuracy and, failing such question, the statements will be deemed correct. If the Optionor objects to the accuracy of particular statements or the amount of payment within 60 days after receipt of such statements, a chartered professional accountant mutually acceptable to the parties and retained by the Optionor may promptly audit the Optionee’s relevant records at an office selected by the Optionee and during the Optionee’s normal business hours. Any such audit will be made at the sole expense of the Optionor if the audit determines that the payment in question was accurate within five percent (5%). Any such audit will be made at the sole expense of the Optionee if the audit determines that the payment in question was inaccurate by more than five percent (5%). In any case, the payment in question will be promptly adjusted to reflect the results of the audit.
4. The Optionor or its representative(s) duly appointed in writing will have the right at all reasonable times, upon written request, to inspect such technical resource and production data, books and financial records of the Optionee as are relevant to the determination of the Royalty and at the Optionor’s expense, to make copies thereof.
5. If the Optionee elects to engage in hedging activities, forward selling, metal loans, metal streaming, stockpiling of any mineral concentrates or metals produced from the Property or any similar such actions, there shall be included in the term “**Net Smelter Returns**” the actual value of such minerals, concentrates or metals produced but not sold. The actual value shall be determined using the prices for such products on the day that such

product would have been sold were it not for the actions of the Optionee and such values shall be added to the Net Smelter Return. The prices for such minerals, concentrates or metals shall be as set by the London Metals Exchange or as set out in some similar generally recognized publication for the relevant period or in the case of precious metals the afternoon fixing for the price of the precious metals as quoted on the London Bullion Market Association or similar recognized quotation service. Hedging profits and losses are to be excluded from affecting the actual value. Further, the actual value shall not include any profits, losses or transaction costs for any futures trading or commodity options trading or any other price hedging, price protection, derivative or speculative arrangements including future metal streaming arrangements which may involve the possible delivery of Products produced from the Property.

6. If any portion of the minerals, metals or concentrates extracted and derived from the ore mined and removed from the Property are sold to a purchaser owned or controlled by Optionee, or treated by a smelter owned or controlled by Optionee the actual proceeds received shall be deemed to be an amount equal to what could be obtained from a purchaser or a smelter not so owned or controlled in respect of minerals, metals or concentrates, as applicable, of like grade, quality and quantity.
7. For the purpose of determining Net Smelter Returns, all receipts and disbursements in currency other than Canadian or US dollars shall be converted into Canadian or US currency on the day of receipt or disbursement, as the case may be, using the Bank of Canada noon exchange rate posting.
8. The obligation of Optionee to pay the Royalty is an obligation which creates an interest in the Property, or any successor title, and an interest in the minerals, metals and concentrates extracted and removed from the claims.
9. Minerals, metals and concentrates extracted and removed from the Property may be integrated with and operated as a single operation with other mining properties owned by third parties or in which Optionee has an interest, in which event, the parties agree that (notwithstanding separate ownership thereof) all materials mined, extracted and removed from such other mining properties owned by third parties and subsequently milled, treated or otherwise beneficiated for the purpose of removing its mineral content (the “**Third Party Ore**”) may be blended and commingled at the time of mining or at any time thereafter with the minerals, metals or concentrates from the Property, provided however, that such commingling is accomplished only after the quantity, character and mineral content of any minerals have been determined or ascertained by sound assaying or engineering principles consistently applied and provided further that respective mining properties shall bear and have allocated to them the proportionate share of charges and costs described in Section 1 above as well as the proportionate share of charges and costs affected by the tonnage and respective characteristics of Third Part Ore and other materials mined and beneficiated and the characteristics of such material including the metal content of such minerals, metals or concentrates removed from, and to any special charges relating particularly to Third Party Ores, concentrates or other products or the treatment thereof derived from any such mining properties.

10. The Optionee shall ensure that customary and usual practices and procedures are adopted and employed for weighing, determining moisture content, sampling and assaying and determining recovery factors for the mineral, metals and concentrates extracted, derived, and removed from the Property and Third Party Ores and shall record such data in order to determine the amount of economically recoverable materials extracted or derived from such minerals, metals and concentrates and Third Party Ores. Optionee shall maintain accurate records of the results of such sampling, weighing and analysis and the Optionor shall be permitted to the right to examine, at all reasonable times and at its own cost, such records relating to any blending and commingling of minerals, metals and concentrates and Third Party Ores.
11. Any dispute respecting the Royalty shall be settled by arbitration as set out in the Agreement.
