The accompanying notes are an integral part of these condensed interim consolidated financial statements.

1. NATURE OF OPERATIONS AND GOING CONCERN

American Copper Development Corporation (formerly Cirrus Gold Corp.) (the "Company") was incorporated on February 5, 2020, under the laws of British Columbia. The Company's head office is located at 2710 – 200 Granville Street, Vancouver, BC, and its registered and records office is located at #2600 – 1066 West Hastings Street, Vancouver, B.C. To date, the Company has not earned operating revenue.

The Company is in the process of acquiring and exploring exploration and evaluation assets and has not yet determined whether such properties contain reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

As at September 30, 2022, the Company has generated negative cash flows from operating activities and has an accumulated deficit of $1,606,712. The Company expects to incur further losses in the development of its operations. The Company's ability to continue its operations and to realize its assets at their carrying values is dependent upon obtaining additional financing or generating sufficient revenues to cover its operating costs. These factors indicate the existence of material uncertainties that may cast significant doubt as to the Company's ability to continue as a going concern.

These financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and thus be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in these financial statements.

In addition, the COVID-19 pandemic has created a dramatic slowdown in the global economy. The duration of the COVID-19 outbreak and the resultant travel restrictions, social distancing, Government response actions, business closures and business disruptions, can all have an impact on the Company's operations and access to capital. There can be no assurance that the Company will not be further impacted by adverse consequences that may be brought about by the COVID-19 pandemic on global financial markets which may reduce share prices and financial liquidity and thereby severely limit the financing capital available to the Company.

2. SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance and basis of presentation

The Board of Directors of the Company approved the condensed interim consolidated financial statements on November 16, 2022.

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including International Accounting Standard ("IAS") 34, "Interim Financial Reporting". The condensed interim financial statements do not include all note disclosures required by IFRS for annual financial statements and should be read in conjunction with the annual financial statements for the year ended December 31, 2021, which have been prepared in accordance with IFRS as issued by the IASB. In the opinion of management, all adjustments considered necessary for fair presentation of the Company's financial position, results of operations and cash flows have been included. Operating results for the nine-month period ended September 30, 2022 are not necessarily indicative of the results that may be expected for the year ending December 31, 2022.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd…)

These condensed interim financial statements have been prepared on a historical cost basis, except for financial instruments classified as held-for-trading, which are stated at their fair value. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting. These condensed interim consolidated financial statements are prepared in Canadian dollars.

These consolidated financial statements of the Company include the balances of its subsidiary, American Copper NMX, Inc. which is a 100% wholly owned subsidiaries.

The Company consolidates its subsidiaries on the basis that it controls the subsidiaries through its ability to govern its financial and operating policies. All intercompany transactions and balances are eliminated on consolidation.

Significant accounting judgements, estimates and assumptions

The preparation of the Company's condensed interim financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities and contingent liabilities at the date of the condensed interim financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Significant areas requiring the use of management judgements, estimates and assumptions include:

- The assessment of whether certain factors (both internal and external) would be considered an indicator of impairment and whether impairment testing is required on the exploration and evaluation assets.
- The determination that the Company will continue as a going concern for the next year.

8. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data

The fair value of cash is measured at Level 1 of the fair value hierarchy. The carrying value of accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

Financial risk factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and receivables. Management believes that the credit risk concentration with respect to financial instruments included in receivables is remote and has deposited cash in high credit quality financial institutions.

Liquidity risk

As of September 30, 2022, the Company had cash balance of $8,293,426 to settle current liabilities of $797,757. The Company is exposed to liquidity risk.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

Interest rate risk

The Company has cash balances and no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade demand investments issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

8. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd…)

Foreign currency risk

The Company is exposed to foreign currency risk on fluctuations related to assets, liabilities and expenditures that are denominated in USD.

Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's profit or loss due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on profit or loss and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices, individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company. Fluctuations in value may be significant.

9. CAPITAL MANAGEMENT

The Company defines the capital that it manages as the aggregate of share capital, contributed surplus and deficit.

The Company manages its capital structure and adjusts it, based on the funds available to the Company, in order to support the acquisition and exploration of exploration and evaluation assets. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company relies on the equity markets to fund its activities. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is enough economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital restrictions. There were no changes to the Company's approach to capital management during the period.
