

DIAGNAMED HOLDINGS CORP.

**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS –
QUARTERLY HIGHLIGHTS**

Three and Nine Months Ended June 30, 2024

(Expressed in Canadian Dollars)

Dated: August 22, 2024

INTRODUCTION

Diagnamed Inc. ("Diagnamed") was incorporated under the Business Corporations Act (Ontario) on October 5, 2020. The registered head office of the Company is 82 Richmond Street East, Toronto, ON, M5C 1P1, Canada.

Diagnamed is a generative AI healthcare solutions company focused on the development and commercialization of BRAIN AGE® BRAIN HEALTH, a proprietary brain health AI platform for the healthcare market.

Diagnamed Holdings Corp. (formerly Wolf Acquisition 2.0 Corp. ("combined entity"), or "Wolf") was incorporated under the Business Corporations Act (British Columbia) on April 16, 2021.

On August 11, 2021, Wolf issued 73,250,085 common shares as consideration for acquisition of the 73,250,085 outstanding common shares in the capital of Diagnamed. The Acquisition was accounted for as a reverse takeover ("RTO") whereby Diagnamed was identified as the acquirer for accounting purposes and the resulting consolidated financial statements are presented as a continuance of Diagnamed. After the RTO, the combined entity of Wolf and Diagnamed is referred to also as "the Company" in this MD&A. The fiscal year end of the Company is September 30. On November 8, 2022, the Company's common shares were approved for listing on the Canadian Securities Exchange (the "CSE") and commenced trading under the trading symbol "DMED".

The Canadian Dollar is the Company's functional and reporting currency. Unless otherwise noted, all dollar amounts are expressed in Canadian Dollars.

The following interim Management's Discussion & Analysis ("Interim MD&A") of the Company for the three and nine months ended June 30, 2024, has been prepared to provide material updates to the business operations, liquidity, and capital resources of the Company since its last annual management's discussion & analysis, being the Management's Discussion & Analysis ("Annual MD&A") for the year ended September 30, 2023. This Interim MD&A does not provide a general update to the Annual MD&A, or reflect any non-material events since the date of the Annual MD&A.

This Interim MD&A has been prepared in compliance with section 2.2.1 of Form 51-102F1, in accordance with National Instrument 51-102 – Continuous Disclosure Obligations. This discussion should be read in conjunction with the Annual MD&A and audited annual consolidated financial statements of the Company for the year ended September 30, 2023, together with the notes thereto, and unaudited condensed interim consolidated financial statements of the Company for the three and nine months ended June 30, 2024, together with the notes thereto. Results are reported in Canadian dollars, unless otherwise noted. The Company's financial statements and the financial information contained in this Interim MD&A are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board and interpretations of the IFRS Interpretations Committee. The unaudited condensed interim consolidated financial statements have been prepared in accordance with International Standard 34, Interim Financial Reporting. Accordingly, information contained herein is presented as of August 22, 2024, unless otherwise indicated.

Further information about the Company and its operations can be obtained from the offices of the Company.

CAUTIONARY NOTE REGARDING FORWARD LOOKING INFORMATION

This Interim MD&A contains forward-looking information and statements ("forward-looking statements") which may include, but are not limited to, statements with respect to the future financial or operating performance of the Company. Forward-looking statements reflect the current expectations of management regarding the Company's future growth, results of operations, performance and business prospects and opportunities. Wherever possible, words such as "may", "would", "could", "will", "anticipate", "believe", "plan", "expect", "intend", "estimate" and similar expressions have been used to identify these forward-looking statements. These statements reflect management's current beliefs with respect to future events and are based on information currently available to management. Forward-looking statements involve significant risks, uncertainties and assumptions. Many factors could cause the

actual results, performance or events to be materially different from any future results, performance or events that may be expressed or implied by such forward-looking statements, including, without limitation, those listed in the "Risk Factors" section of this Interim MD&A. Although the Company has attempted to identify important factors that could cause actual results, performance or events to differ materially from those described in the forward-looking statements, there could be other factors unknown to management or which management believes are immaterial that could cause actual results, performance or events to differ from those anticipated, estimated or intended. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results, performance or events may vary materially from those expressed or implied by the forward-looking statements contained in this Interim MD&A. These factors should be considered carefully, and readers should not place undue reliance on the forward-looking statements. Forward-looking statements contained herein are made as of the date of this Interim MD&A and the Company assumes no responsibility to update forward looking statements, whether as a result of new information or otherwise, other than as may be required by applicable securities laws.

Forward-Looking Statements	Assumptions	Risk Factors
The Company's (i) development of product candidates, (ii) demonstration of such product candidates' safety and efficacy in clinical trials, and (iii) obtaining regulatory approval to commercialize these product candidates.	Financing will be available for development of new product candidates and conducting clinical studies; the actual results of the clinical trials will be favourable; development costs will not exceed Diagnamed's expectations; the Company will be able to retain and attract skilled staff; the Company will be able to recruit suitable patients for clinical trials; all requisite regulatory and governmental approvals to commercialize the product candidates will be received on a timely basis upon terms acceptable to Diagnamed; applicable economic conditions are favourable to Diagnamed.	Availability of financing in the amount and time frame needed for the development and clinical trials may not be favourable; increases in costs; the Company's ability to retain and attract skilled staff; the Company's ability to recruit suitable patients for clinical trials; timely and favourable regulatory and governmental compliance, acceptances, and approvals; interest rate and exchange rate fluctuations; changes in economic conditions.
The Company's ability to obtain the substantial capital it requires to fund research and operations.	Financing will be available for Diagnamed's research and operations and the results thereof will be favourable; debt and equity markets, exchange and interest rates and other applicable economic conditions are favourable to Diagnamed.	Changes in debt and equity markets; timing and availability of external financing on acceptable terms; increases in cost of research and operations; interest rate and exchange rate fluctuations; adverse changes in economic conditions.
Factors affecting pre-clinical research, clinical trials and regulatory approval process of the Company's product candidates.	Actual costs of pre-clinical research, clinical and regulatory processes will be consistent with the Company's current expectations; the Company will be able to retain and attract skilled staff; the Company will be able to recruit suitable patients for clinical trials; the Company will be able to complete pre-clinical research and clinical studies on a timely basis with favourable results; all applicable regulatory and governmental approvals for product candidates will be received on a timely basis with terms	Diagnamed's product candidates may require time-consuming and costly pre-clinical and clinical studies and testing and regulatory approvals before commercialization; the Company's ability to retain and attract skilled staff; the Company's ability to recruit suitable patients for clinical trials; adverse changes in regulatory and governmental processes; interest rate and exchange rate fluctuations; changes in economic and political conditions;

Forward-Looking Statements	Assumptions	Risk Factors
	acceptable to Diagnamed; debt and equity markets, exchange and interest rates, and other applicable economic and political conditions are favourable to Diagnamed; there will be a ready market for the product candidates.	the Company will not be adversely affected by market competition.
The Company's ability to commercialize on its own or find and enter into agreements with potential partners to bring viable product candidates to commercialization.	Diagnamed will be able to commercialize on its own or to find a suitable partner and enter into agreements to bring product candidates to market within a reasonable time frame and on favourable terms; the costs of commercializing on its own or entering into a partnership will be consistent with Diagnamed's expectations; partners will provide necessary financing and expertise to bring product candidates to market successfully and profitably.	Diagnamed will not be able to commercialize on its own or find a partner and/or enter into agreements within a reasonable time frame; if the Company enters into agreements, these agreements may not be on favourable terms to Diagnamed; costs of entering into agreements may be excessive; potential partners will not have the necessary financing or expertise to bring product candidates to market successfully or profitably.
The Company's ability to obtain and protect the Company's intellectual property rights and not infringe on the intellectual property rights of others.	Patents and other intellectual property rights will be obtained for viable product candidates; patents and other intellectual property rights obtained will not infringe on others.	Diagnamed will not be able to obtain appropriate patents and other intellectual property rights for viable product candidates; patents and other intellectual property rights obtained will be contested by third parties; no proof that acquiring a patent will make the product more competitive.
The Company's ability to source markets which have demand for its products and successfully supply those markets in order to generate sales.	The anticipated markets for the Company's potential products and technologies will continue to exist and expand; the Company's products will be commercially viable and it will successfully compete with other research teams who are also examining potential products.	The anticipated market for the Company's potential products and technologies will not continue to exist and expand for a variety of reasons, including competition from other products and the degree of commercial viability of the potential product.
Future actions with respect to and potential impacts of pending claims.	Diagnamed will be able to settle or otherwise obtain disposition of claims against it on favourable terms.	Diagnamed may will not be able to settle pending claims on favourable terms; claims may be adjudicated in a manner that is not favourable to Diagnamed.

Inherent in forward-looking statements are risks, uncertainties and other factors beyond the Company's ability to predict or control. Please also make reference to those risk factors referenced in the "Risk Factors" section below. Readers are cautioned that the above chart does not contain an exhaustive list of the factors or assumptions that may affect the forward-looking statements, and that the assumptions underlying such statements may prove to be incorrect. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this Interim MD&A.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance or achievements to be materially different from any of its future results, performance or achievements expressed or implied by forward-looking statements. All forward-looking statements herein are qualified by this cautionary statement. Accordingly, readers should not place undue reliance on forward-looking statements. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking statements whether as a result of new information or future events or otherwise, except as may be required by law. If the Company does update one or more forward-looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements, unless required by law.

BUSINESS OVERVIEW

The principal business carried on and intended to be carried on by the Company is the development and commercialization of AI healthcare solutions, which includes BRAIN AGE® BRAIN HEALTH AI platform for the healthcare market.

The Company's goal is to commercialize BRAIN AGE® BRAIN HEALTH AI platform for personal use and clinical research.

The Company is prioritizing resources to focus on BRAIN AGE® BRAIN HEALTH for the healthcare market. The Company will no longer pursue the development of BrainTremor™ and VR/AI Neuro.

BRAIN AGE® BRAIN HEALTH

BRAIN AGE® BRAIN HEALTH is a brain health AI platform leveraging that aims to predict and monitor brain age and provide actionable insights for mental health and neurodegenerative disorders. Based on research and development at Drexel University and the University of Miami, BRAIN AGE® BRAIN HEALTH combines a Brain Age™ Estimation and Brain Health Assessment tool. BRAIN AGE® BRAIN HEALTH can assess if a brain is aging more quickly or more slowly than is typical for healthy individuals. Brain age is estimated by collecting neural activity data of the brain with a low-cost and easy-to-use electroencephalogram ("EEG") headset and calculating the data with a proprietary machine-learning model. In addition, BRAIN AGE® BRAIN HEALTH can assess if a person has a healthy brain or is in the early stage of cognitive decline. Brain health is scored by taking a clinically validated assessment for brain resilience, vulnerability and performance functions. Individuals can seek out personalized diagnostics and interventions, such as medication or lifestyle changes, that may help to decrease the development or progression of cognitive decline.

DiagnaMed is investigating technological applications that monitor, collect and use individual information to detect the brain age. In August 2021, DiagnaMed commenced the development of its brain detection software platform, Brain Age™. Brain Age™ is a highly accurate EEG-based machine-learning technique for assessing whether an individual's brain is aging more quickly or more slowly than is typical for healthy individuals. This method provides a window into general brain health by detecting the combined effects of physiological, pathological, genetic, environmental, and lifestyle factors that affect the rate at which a brain ages. Some people's brains function as if older than their chronological age; other people's brains function as if younger. The difference between one's chronological age and one's "brain age" is called the "brain-age gap" (BAG). The Company believes that understanding how brains age is important for understanding and diagnosing age-related neurological disorders so they can be detected and treated early. It is also an important resource for understanding how neurological disorders, injuries, and environmental insults may prematurely age a brain and how particular interventions and lifestyles may preserve or enhance it.

The Company's EEG brain-age estimation technique has a number of practical, commercially promising applications. It can be used as a screening tool to identify individuals whose brain-age gaps suggest underlying age-related pathology (e.g., Parkinson's disease or Alzheimer's disease) that can be followed up with specific neurological diagnostic tests. It raises the possibility of detecting and treating the earliest phases of age-related neurological disorders such as Alzheimer's disease rather than waiting for the emergence of overt symptomatology characteristic of advanced – and currently untreatable – pathology.

The Company's EEG-based brain-age estimation technique would be a useful tool for researchers who wish to test potential interventions for slowing or reversing neurological aging and age-related neurological diseases. Also, the Company is investigating the uses of inexpensive, consumer EEG systems that are increasing in accuracy to enable brain-age estimation at home. This would allow people to periodically test the effects of diet, exercise, meditation, and other lifestyle changes on their brain age.

The development of BRAIN AGE® BRAIN HEALTH constitutes a significant project that has not yet generated revenue. The Company is using both internal resources, research institutions and third party consultants to develop BRAIN AGE® BRAIN HEALTH and expects commercialization of BRAIN AGE® BRAIN HEALTH in 2024.

BrainTremor™

DiagnaMed was investigating technological applications that monitor, collect and use individual information to detect tremors, and measuring cognitive and brain activity in patients with neurological disorders. The Company was developing BrainTremor™, combining a smartwatch and an EEG device that will detect tremors, and measure cognitive and brain activity for Parkinson's disease. Part of BrainTremor™ has been in research and co-development for some time by the University of Colorado Boulder.

The development of BrainTremor™ has not yet generated revenue. The Company will no longer pursue the development of BrainTremor™.

VR/AI Neuro

DiagnaMed was investigating a novel virtual reality and artificial intelligence neurodiagnostic system ("VR/AI Neuro") for the evaluation, diagnosis and monitoring of neurodegenerative diseases, such as Parkinson's disease. The VR/AI Neuro system aimed to enable clinical and remote neurological diagnosis on a low-cost, portable virtual reality device that can visualize eye movements in videos and interface with the physician who is in a different location than the patient, which may result in more accurate diagnoses, less time spent on making a correct diagnosis for the physician, and lower transportation costs for patients. The VR/AI Neuro system has been in research and co-development for some time by Kansas University Medical Center, Osaka University and Augusta University.

The development of VR/AI Neuro system has not yet generated revenue. The Company will no longer pursue the development VR/AI Neuro.

CORPORATE HIGHLIGHTS

On October 3, 2023, the Company announced the launch of BRAIN AGE® BRAIN HEALTH Healthcare Provider Network, a partnership program to expand access to the Company's brain health AI platform for healthcare providers, including hospitals, doctor offices, medical clinics, research and clinical specialists in Canada and the USA.

On November 15, 2023, the Company announced that it been accepted into the Southern Ontario Pharmaceutical & Health Innovation Ecosystem ("SOPHIE") Program to accelerate the clinical and commercialization efforts in Canada for the Company's BRAIN AGE® BRAIN HEALTH AI Platform.

On January 17, 2024, the Company announced the pilot launch of BRAIN AGE® BRAIN HEALTH, a world-first consumer brain health and wellness AI solution that aims to 'raise a red flag' for potential brain health issues by estimating brain age and providing a brain health score.

On March 11, 2024, the Company announced that it has been accepted into the Hamilton Ecosystem to Accelerate and Leverage Trials of Health Innovation ("HEALTHI") program to accelerate the clinical research and commercialization efforts in Canada for the Company's BRAIN AGE® BRAIN HEALTH AI Platform.

On March 14, 2024, the Company announced that it has strengthened support for its intellectual property portfolio by being a client of Intellectual Property Ontario ("IPON") Partner Program and the National Research Council of Canada Industrial Research Assistance Program ("NRC IRAP") IP Assist program, which combined, offers a potential of \$150,000 in non-dilutive funding. The Company has made significant progress in its AI algorithms and software and achieved certain research milestones that merit IP protection for commercializing BRAIN AGE® BRAIN HEALTH AI solution.

On March 20, 2024, the announced its application for registration for trademark on its BRAIN AGE® brand has been approved by the Canadian Intellectual Property Office (CIPO), particularly for commercial use throughout Canada for the goods and services for which it is registered as a neurological monitoring apparatus, electroencephalogram-based apparatus, and brain monitoring apparatus.

On April 3, 2024, the Company announced it has added Drexel University as a new test launch site of CERVAI™, a world-first consumer brain health and wellness AI solution. The Company continues to expand its commercial initiatives in the U.S. and Canada for its CERVAI™ Brain Health AI Platform, which includes the BRAIN AGE® estimation solution, with world-class clinicians and hospital facilities such as the University of Miami Comprehensive Center for Brain Health, and in Canada's leading research hospitals, such as Hamilton Health Sciences and St. Joe's Healthcare Hamilton.

On April 23, 2024, the Company announced that BRAIN AGE® Brain Health AI, a world-first consumer brain health and wellness AI solution that estimates brain age and provides a brain health score, is available to Canadian-based clinics focusing on health and wellness, sports and physical therapy, mental health, chiropractic care, or clinical and academic research for neurological and cognitive disorders.

On April 25, 2024, the Company announced a clinical validation milestone of the BRAIN AGE® Brain Health AI Platform ("BRAIN AGE®"), a world-first consumer brain health and wellness AI solution that estimates brain age and provides a brain health score, with a first-of-a-kind peer-reviewed paper in Frontiers in Neuroergonomics, titled "Brain-age estimation with a low-cost EEG-headset: effectiveness and implications for large- scale screening and brain optimization".

May 15, 2024, the Company announced that it was commercializing its novel BRAIN AGE® Brain Health AI Platform ("BRAINAGE®"), a world-first consumer brain health and wellness AI solution that estimates brain age and provides a brain health score, targeting the global digital brain health market.

On August 15, 2024, the Company announced that it was offering its novel BRAIN AGE® Brain Health AI Platform ("BRAIN AGE®") as a clinical tool for investigating the impact of weight loss drugs, such as Semaglutide, on brain function.

TRENDS AND ECONOMIC CONDITIONS

Management regularly monitors economic conditions and estimates their impact on the Company's operations and incorporates these estimates in both short-term operating and longer-term strategic decisions. Strong equity markets are favorable conditions for completing a public merger or acquisition transaction.

At the date of this Interim MD&A, the Canadian government has not introduced measures which impede the activities of the Company. Management believes the business will continue and accordingly the current situation bears no impact on management's going concern assumption. However, it is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company in future periods.

Apart from these and the risk factors noted under the heading "Risk Factors" and "Cautionary Note Regarding Forward-Looking Information", management is not aware of any other trends, commitments, events or uncertainties that would have a material effect on the Company's business, financial condition or results of operations.

RESULTS OF OPERATIONS

The Company reported a net loss of \$220,622 for the three months ended June 30, 2024 which is comprised of \$77,888 research expense which is comprised of \$20,250 for BrainTremor™ and \$57,638 for BRAIN AGE® BRAIN HEALTH, \$19,374 professional fees which is comprised of \$12,230 accounting, \$6,000 audit fees and \$1,144 legal fees, \$45,000 consulting fees relating to management advisory, business development, technical and regulatory advisory and marketing, \$10,796 shareholder information, \$13,981 office and general, interest income of (\$51,450) and foreign exchange loss of \$2,133.

The Company reported a net loss of \$194,009 for the three months ended June 30, 2023 which is comprised of \$83,727 research expense which is comprised of (\$23,614) for BrainTremor™ and \$107,341 for Brain Age™, \$18,599 professional fees which is comprised of \$11,964 accounting, \$5,000 audit fees and \$1,635 legal fees, \$57,122 consulting fees relating to management advisory, business development, technical and regulatory advisory and marketing, \$16,669 shareholder information, \$36,468 office and general and foreign exchange gain of \$18,576.

The Company reported a net loss of \$307,378 for the nine months ended June 30, 2024 which is comprised of \$263,244 research expense which is comprised of \$60,750 for BrainTremor™ and \$202,494 for BRAIN AGE® BRAIN HEALTH, \$82,167 professional fees which is comprised of \$45,615 accounting, \$19,309 audit fees and \$17,243 legal fees, \$141,875 consulting fees relating to management advisory, business development, technical and regulatory advisory and marketing, \$35,288 shareholder information, \$70,181 office and general, \$249,741 gain on settlement of debt, interest income of \$2,239 and foreign exchange gain of \$33,397.

The Company reported a net loss of \$975,293 for the nine months ended June 30, 2023 which is comprised of \$393,115 research expense which is comprised of \$120,712 for BrainTremor™ and \$272,403 for Brain Age™, \$128,546 professional fees which is comprised of \$60,586 accounting, \$17,536 audit fees and \$50,424 legal fees, \$363,100 consulting fees relating to management advisory, business development, technical and regulatory advisory and marketing, \$10,351 stock-based compensation, \$64,983 shareholder information, \$56,489 office and general and foreign exchange gain of \$41,291.

RESEARCH ACTIVITIES

BRAIN AGE® BRAIN HEALTH

BRAIN AGE® Brain Health is a brain health AI platform leveraging that aims to predict and monitor brain age and provide actionable insights for mental health and neurodegenerative disorders.

During the three and nine months ended June 30, 2024, the Company incurred \$57,638 and \$202,494 research expenses respectively (three and nine months ended June 30, 2023 - \$107,341 and \$272,403, respectively) on BRAIN AGE® Brain Health project.

BrainTremor™

DiagnaMed is investigating technological applications that monitor, collect and use individual information to detect tremors, and measuring cognitive and brain activity in patients with neurological disorders.

During the three and nine months ended June 30, 2024, the Company incurred \$20,250 and \$60,750 research expenses respectively (three and nine months ended June 30, 2023 - (\$23,614) and \$120,712, respectively) on BrainTremor™ project.

COMMITMENTS

On June 24, 2021, the Company has entered into a licensing arrangement with the Drexel University relating to the BrainAge™ project, whereby US\$2,500 will be paid each year and certain milestone payments and royalties are payable upon the achievement of certain events. The Company will record these amounts as the events occur.

On December 8, 2021, the Company entered into a licensing agreement with the University of Colorado relating to certain patents held by the University of Colorado for self-healable, recyclable, reconfigurable and wearable electronics devices. The Company is committed to pay to University of Colorado license fees of US\$10,000 on December 8, 2021 (the "Effective Date") and license maintenance fees as follows: US\$10,000 on the third anniversary of the Effective Date, US\$15,000 on the fourth anniversary of the Effective Date, US\$30,000 on the fifth anniversary of the Effective Date, US\$50,000 on the sixth anniversary of the Effective Date and US\$75,000 on the seventh and subsequent anniversaries of the Effective Date until the termination of the agreement. On April 11, 2023, the license agreement was terminated and there are no further obligations.

On November 15, 2022, the Company announced it entered into a license agreement with KU Center for Technology Commercialization, Inc. ("KUTC"), a non-profit corporation of the University of Kansas, for the development and commercialization of intellectual property of a novel virtual reality and artificial intelligence neurodiagnostic system ("VR/AI Neuro") for the evaluation, diagnosis and monitoring of neurodegenerative diseases, such as Parkinson's disease. The Company paid to KUTC a one-time license fee of US\$6,000 and committed to pay annual license maintenance fees of US\$2,000. On July 10, 2023, the license was terminated and there are no further obligations.

On February 22, 2023, the Company announced it entered into a license agreement with the University of Miami ("UM") for the development and commercialization of intellectual property of a novel brain health platform for the evaluation, diagnosis and monitoring of brain health, such as Alzheimer's disease and related dementias, which will be incorporated with BRAIN AGE® BRAIN HEALTH. The Company paid to UM a one-time license fee of US\$15,000 and committed to pay license maintenance fees of US\$10,000 on the third and each subsequent anniversary.

LIQUIDITY AND CAPITAL RESOURCES

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or as a result of conditions specific to the Company. The Company regularly evaluates its cash position to ensure preservation and security of capital as well as maintenance of liquidity. As the Company does not presently generate revenue to cover its costs, managing liquidity risk is dependent upon the ability to secure

additional financing. The recoverability of the carrying value of the assets and the Company's continued existence is dependent upon the achievement of profitable operations, or the ability of the Company to raise alternative financing, as necessary. While management and the Board have been successful in raising the necessary capital, it cannot provide assurance that it will be able to execute on its business strategy or be successful in future financing activities.

As at June 30, 2024, the Company had a cash balance of \$172,502 and accounts receivable of \$29,617 which represent the HST and other receivables to settle current liabilities of \$273,607. This represents a working capital deficit of \$71,488 which is comprised of current assets less current liabilities. The Company has not yet realized profitable operations and has incurred losses to date resulting in a cumulative deficit of \$4,665,563 as at June 30, 2024.

RELATED PARTY TRANSACTIONS

Related parties include the Board of Directors, officers, close family members and enterprises that are controlled by these individuals as well as certain persons performing similar functions.

The Chief Financial Officer ("CFO") of the Company is an employee of Marrelli Support Services Inc. ("MSSI"). During the three months ended June 30, 2024, the Company incurred professional fees of \$10,040 and \$38,662, respectively (three and nine months ended June 30, 2023 - \$10,040 and \$54,893, respectively) to MSSI. These services were incurred in the normal course of operations for general accounting and financial reporting matters. As at June 30, 2024, MSSI was owed \$2,318 (September 30, 2023 - \$2,318) inclusive of HST with respect to services provided, and this amount was included in accounts payable and accrued liabilities.

During the three and nine months ended June 30, 2024, the Company incurred consulting fees of \$45,000 and \$135,000, respectively (three and nine months ended June 30, 2023 - \$45,000 and \$135,000, respectively) to the Chief Executive Officer ("CEO") and companies controlled by the CEO. As at June 30, 2024, the CEO and companies controlled by the CEO were owed \$nil (September 30, 2023 - \$nil).

During the three and nine months ended June 30, 2023, the Company recorded \$nil (three and nine months ended June 30, 2023 - \$nil and \$10,091, respectively) stock-based compensation for key management of the Company.

CAPITAL MANAGEMENT

The Company objectives when manages its capital is to ensure sufficient financial flexibility to achieve the ongoing business objectives including funding of future growth opportunities, and pursuit of accretive acquisitions and to maximize shareholder return through enhancing the share value.

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company may manage its capital structure by issuing new shares, repurchasing outstanding shares, adjusting capital spending, or disposing of assets. The capital structure is reviewed by management and the Board of Directors on an ongoing basis. The Company's ability to continue to carry out its planned activities is uncertain and dependent upon the continued financial support of its shareholders and securing additional financing.

The Company considers its capital to be equity, which comprises share capital, special warrants, warrants, contributed surplus and, accumulated deficit, which at June 30, 2024 totaled deficiency of \$71,488.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

OFF-BALANCE SHEET ARRANGEMENTS

As of the date of this filing, the Company does not have any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future effect on the results of operations or financial condition of the Company including, without limitation, such considerations as liquidity and capital resources that have not previously been discussed.

CURRENT GLOBAL FINANCIAL CONDITIONS AND TRENDS

Management regularly monitors economic conditions and estimates their impact on the Company's operations and incorporates these estimates in both short-term operating and longer-term strategic decisions. During fiscal 2023, equity markets in Canada showed signs of weakness and the current global market uncertainties associated with the COVID-19 pandemic, the ongoing Russo-Ukrainian War, and conflicts in the Middle East are creating an uncertain future. Apart from these and the risk factors noted under the heading "Risks and Uncertainties", management is not aware of any other trends, commitments, events or uncertainties that would have a material effect on the Company's business, financial condition or results of operations. See "Risks and Uncertainties" below.

RISK FACTORS

An investment in the securities of the Company is highly speculative and involves numerous and significant risks. Such investment should be undertaken only by investors whose financial resources are sufficient to enable them to assume these risks and who have no need for immediate liquidity in their investment. Prospective investors should carefully consider the risk factors that have affected, and which in the future are reasonably expected to affect, the Company and its financial position. Please refer to the section entitled "Risk Factors " in the Company's Annual MD&A for the year ended September 30, 2023.
