

PR TECHNOLOGY INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE SIX MONTHS ENDED JUNE 30, 2022
(EXPRESSED IN CANADIAN DOLLARS)

The Management Discussion and Analysis ("MD&A") of PR Technology Inc. (the "Company", or "PRT") is prepared as of August 31, 2022 and should be read in conjunction with the condensed consolidated interim financial statements for the six months ended June 30, 2022 and the audited consolidated financial statements for the year ended December 31, 2021 of PRT, which were prepared in accordance with International Financial Reporting Standards ("IFRS"). All dollar amounts referred to in this MD&A are expressed in Canadian dollars, unless otherwise noted.

Management is responsible for the preparation and integrity of the financial statements, including the maintenance of appropriate information systems, procedures and internal controls to ensure that information used internally or disclosed externally, including the financial statements and MD&A, is complete and reliable.

FORWARD-LOOKING STATEMENTS

Certain statements contained in this MD&A constitute forward-looking statements. All statements other than statements of historical fact may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "designed", "expect", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions. In making the forward-looking statements included in this MD&A, the Company has made various material assumptions, including, but not limited to: (i) obtaining any regulatory approvals; (ii) assumptions regarding general business and economic conditions; (iii) the Company's ability to successfully develop its products; (iv) that the Company's current positive relationships with third parties will be maintained; (v) the availability of financing on reasonable terms; (vi) the Company's ability to attract and retain skilled employees and consultants; (vii) assumptions regarding market competition; (viii) the products and technology offered by the Company's competitors and (ix) the Company's ability to protect patents and proprietary rights.

These statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking statements. Based on current available information, the Company believes that the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that those expectations will prove to be correct. The forward-looking statements in this MD&A are expressly qualified by this statement, and readers are advised not to place undue reliance on the forward-looking statements.

New risk factors may arise from time to time and it is not possible for management of the Company to predict all of those risk factors that could cause actual results to differ materially from the forward looking information, including market and business conditions, the company's ability to successfully implement its business plan, or raise sufficient capital, change to government policies, currency fluctuations, weather conditions, competition, the company's ability recruit and retain key executives and assistive personnel, and other risks. Although the statements contained in this MD&AD are based upon what management believe to be reasonable assumptions, the company cannot assure investors that actual result will be consistent with these statements. The company does not undertake to update forward looking information at any particular time whether as a result of new information, future events or otherwise, except as required by law.

DESCRIPTION OF BUSINESS

PR Technology Inc. (the "Company") was incorporated pursuant to the provisions of the Business Corporation Act (British Columbia) on April 23, 2019. The principal business of the Company will be to identify and evaluate assets or businesses with a view to potentially acquire them or an interest therein by completing a purchase transaction, or by any concomitant transaction to facilitate a Canadian public listing. The head office and registered office of the Company is located at #644 666 Burrard St. Vancouver, B.C. V6C 2X8.

DESCRIPTION OF BUSINESS

In May 2021, the Company completed an asset transfer between its former parent company, Power Republic Corp, which was primarily focused on developing WPT systems in the automobile industry for RGVs ("Rail Guided Vehicle") used on the factory floor in manufacturing facilities. The Company's RGV WPT technology is based on the magnetic resonance technology and includes transmitters ("Tx") and receivers ("Rx"). The receivers are installed on the RGVs and the transmitters are installed at certain locations along the rail lines. The power is automatically transferred along the rail lines where transmitters are installed. This removes the need for wired charging of the RGVs resulting in improved productivity and reduced wear and tear.

The Company engaged in discussions with an automobile manufacturer in Korea to apply its WPT products in its manufacturing facility. The Company supplied sets of Tx and Rx samples to the manufacturer to test in the manufacturer's facility in Korea. The test samples were applied to RGVs in the manufacturer's automation facility and the results were positive. The Company demonstrated its products for members of the management of the manufacturer in both its domestic and overseas facilities. The Company and the manufacturer have executed a non-disclosure agreement and a non-binding letter of intent.

On November 2nd, 2021, PRT Korea ("PRTK"), a subsidiary of the Company, received its first commercial order from the automobile manufacturer in Korea for 50 Tx and 50 Rx for use in at the automobile manufacturer's plant and will be ready to manufacture those products with internal quality inspection. In the meantime, the Company supplied 4 Tx and 4 Rx to them, and they are currently in the process of testing. The Company was informed that those units would be installed in their newly acquired overseas plant when the test results are positive.

In November 2021, PRTK entered into a strategic alliance agreement with a primary vendor of the automobile manufacturer in Korea pursuant to which the parties agree to share information and cooperate with respect to generating future sales of the Company's WPT products for use in the domestic plants and an overseas plant of the Korean automobile manufacturer. Also, on November 26, 2021, the Company commenced trading on the Canadian Securities Exchange with a symbol of 'PRTI'.

In December 2021, the Company produced the prototype wireless drone charging station and delivered to LIG Nex1 Co., Ltd. The station was installed in a light tactical vehicle that Kia Motors manufactured, and testing is currently underway. The Company was informed that Kia Motors submitted the development plan to the Ministry of National Defense of Korea for review. In addition, the Company produced 500 units of wireless cell phone chargers through OEM in China and kept selling them through various sales channels including online sales on Coupang and Naver in Korea.

In January 2022, the Company contracted with an agency to coordinate the launch and marketing of the wireless LED light for a LEGO toy on the crowdfunding platform Kickstarter in the United States. The Company continued to work with the agency such as landing page design and video production and expected to launch the product in June 2022.

The novel coronavirus ("COVID-19") outbreak was declared a pandemic by the World Health Organization on March 11, 2020. This has resulted in significant economic uncertainty and governments worldwide are enacting emergency measures to contain the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global financial markets have experienced significant volatility and weakness as a consequence of this economic uncertainty. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the effectiveness of interventions by governments and central banks. The full extent of the impact on the Company's future financial results is uncertain given the length and severity of these developments cannot be reliably estimated.

PR Technology Inc.
Management's Discussion and Analysis
For the six months ended June 30, 2022

PRT completed a final review of the landing page design and video production with an agency contracted by the Issuer in January 2022 to coordinate the launch and marketing of wireless LED lighting for LEGO toys on Kickstarter, a US crowdfunding platform. However, the Issuer decided to accept the suggestion of the agency to launch the product in early October as there has been low spendings by customers during summer season.

PRTK, a subsidiary of the issuer, was selected on July 17 by bidding for the nation's national project in KOREA. The contents of the national project are research and development to make upgraded products related to existing factory automation wireless power transmission, and the research will be developed with the support of the state for three years until June 2024.

SELECTED FINANCIAL INFORMATION

The comparative information shown on this MD&A have been prepared using the condensed consolidated interim financial statements for the six months ended June 30, 2022 and the audited consolidated financial statements for the year ended December 31, 2021, and the carve-out financial information that reflects the financial position, results from operations and cash flows of the assets that were transferred to the Company in May 2021.

The following table provides a brief summary of the Company's financial operations:

	As at June 30, 2022 (Unaudited)	As at December 31, 2021 (Unaudited)
Financial Position		
Total current assets	\$ 126,096	\$ 610,624

RESULTS OF OPERATIONS

As of June 30, 2022, the Company has a working capital balance of \$(652,493) (December 31, 2021 – \$330,194), and cash flows used in operations during the six months ended June 30, 2022 of \$428,868 (June 30, 2021 - \$841,420) and a net loss of \$1,723,134 (June 30, 2021 - \$1,642,935). The increased loss is primarily due to the effect of share-based compensation for options granted during the current period.

As of June 30, 2022, the current assets of the Company consist of cash on hand of \$19,357 (December 31, 2021 - \$494,695), various receivables of \$50,432 (December 31, 2021 - \$46,026), inventory of \$19,906 (December 31, 2021 - \$23,472) and prepaid expenses of \$35,304 (December 31, 2021 - \$23,937). The Company also carries a variety of non-currents assets including deposits of \$82,851 (December 31, 2021 - \$77,925), plant & equipment of \$187,842 (December 31, 2021 - \$268,515), intangible assets of \$732,099 (December 31, 2021 - \$929,649), and right-of-use assets of \$182,963 (December 31, 2021 - \$71,378). As of June 30, 2022, the Company has accounts payable of \$682,270 (December 31, 2021 - \$226,344), provision for severance indemnities of \$61,056 (December 31, 2021 - \$53,848), and lease liability of \$177,942 (both current and non-current portion) (December 31, 2021 - \$70,783).

RESULTS OF OPERATIONS

During the six months ended June 30, 2022, the Company had an increase of \$2,703 in amortization and depreciation expense to \$343,820 (2021 - \$312,281). Also, the Company had a decrease in general and administrative expenses of \$102,888 to \$73,871 (2021 - \$176,759). The decrease was due to reallocation of the expense amounts since the business combination and asset transfer.

During the six months ended June 30, 2022, the Company had a decrease in professional fees to \$59,120 (2021 - \$320,886). The decrease was due to a reduction in listing consulting fees. Also, the Company had a gradual increase in research and development of \$21,880 to \$155,011 (2021 - \$133,131).

During the six months ended June 30, 2022, the Company had a decrease in salaries and wages of \$134,604 to \$226,512 (2021 - \$361,116). The decrease was due to reallocation of the expense amounts since the business combination, asset transfer and listing process.

ADDITIONAL DISCLOSURE FOR VENTURE CORPORATION WITHOUT SIGNIFICANT REVENUE

The following table sets forth a breakdown of material components of the Company for the three months ended June 30, 2022.

PROPOSED TRANSACTIONS

As at June 30, 2022, there were no proposed transactions with the Company.

CRITICAL ACCOUNTING ESTIMATES & CHANGES IN ACCOUNTING POLICIES

The Company's significant accounting policies are disclosed in the condensed consolidated interim financial statements and notes thereto for the period ended June 30, 2022.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

The Company's financial instruments consist of cash, receivables, trade payables and accrued liabilities, lease liabilities, provision for severance liabilities, and defined employment benefit liabilities. The carrying amounts of current assets and current liabilities approximate their fair value due to their short period to maturity. The carrying amounts of the long-term liabilities approximate fair value as these liabilities bear interest at variable market rates. It is management's opinion that the Company is not exposed to significant credit, interest, or currency risks arising from these financial instruments except as otherwise disclosed.

RISKS AND UNCERTAINTIES

The Company has a limited history of existence. There can be no assurance that the Company will be able to obtain adequate financing to continue. The following risk factors should be given special consideration when evaluating an investment in any of the Company's securities:

- a) the Company has had a few business activities since its inception;
- b) the Company does not have a history of earnings, nor does it plan on paying any dividends in the near future as it focuses on generating revenue.
- c) There can be no assurance that the Company will generate significant revenue.
- d) the success of the Company is dependent upon the efforts and abilities of its management team and the loss of any member of the management team could have a material adverse effect upon the business and prospects of the Company. In such event, the Company will seek satisfactory replacements but there can be no guarantee that appropriate personnel may be found.

In addition, the shareholders of the Company and potential investors in the Company should now consider the following risk factors of PRT Korea Ltd. and all the other information contained in this MD&A when evaluating the Company and its common shares.

An investment in the Company's shares involves a number of risks, many of which are beyond its control. The risks and uncertainties set out below are all of the known risks, which are deemed to be material to the Company's business or the results of its operations. Additional risks and uncertainties of which the Company is currently unaware or that are deemed immaterial may also adversely affect the Company's business, financial condition, results of operations, cash flows and prospects.

Covid-19

The novel coronavirus ("COVID-19") outbreak was declared a pandemic by the World Health Organization on March 11, 2020. This has resulted in significant economic uncertainty and governments worldwide are enacting emergency measures to contain the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global financial markets have experienced significant volatility and weakness as a consequence of this economic uncertainty. The duration and impact of the COVID-19 outbreak is unknown as this time, as is the effectiveness of interventions by governments and central banks. The full extent of the impact on the Company's future financial results is uncertain given the length and severity of these developments cannot be reliably estimated.

Reliance on Management

The Company relies on key employees and staff members. The success of the Company will be dependent upon the ability, expertise, judgment, discretion and good faith of its senior management and key personnel. Any loss of the services of such individuals could have a material adverse effect on the Company's business, operating results or financial condition.

Operating History

The Company has a limited history of operations. As such, the Company is subject to many risks common to such enterprises, including under-capitalization, cash shortages, limitations with respect to personnel, financial and other resources and lack of revenues. There is no assurance that the Company will be successful in achieving a return on shareholders' investment and the likelihood of the Company's success must be considered in light of the Company's early stage of operations. There is no likelihood of material revenue for a significant period of time based on the early stage of business.

Negative operating cash flow

The Company currently has a negative operating cash flow and may continue to have that for the foreseeable future. The Company's failure to achieve profitability and positive operating cash flows could have a material adverse effect on the Company's financial condition and results of operations.

Insufficient capital and financing requirements

The Company does not currently have any significant revenue producing products and may, from time to time report a working capital deficit. The Company will require substantial additional capital. When such additional capital is required, the Company will need to pursue various financing transactions or arrangements, including, debt financing, equity financing or other means. Additional financing may not be available when needed or, if available, the terms of such financing might not be favourable to us and might involve substantial dilution to existing shareholders. The Company may not be successful in locating suitable financing transactions in the time period required or at all, may not obtain the capital required by other means. A failure to raise capital when needed would have a material adverse effect on the Business, and may require the Company to delay, limit, reduce, or cease operations. Any future issuance of Common Shares to raise required capital will likely be dilutive to shareholders. In addition, debt and other mezzanine financing may involve a pledge of assets and may be senior to interests of equity holders. The Company may incur substantial costs in pursuing future capital requirements, including investment banking fees, legal fees, accounting fees, securities law compliance fees, printing and distribution expenses and other costs. The ability to obtain needed financing may be impaired by such factors as the capital markets (both generally and in the mining industry in particular), the Company's status as a new enterprise with a limited history, and/or the loss of key management personnel.

Development of the business of the Company

The development of the Business and its ability to execute on its expansion opportunities described herein will depend, in part, upon the amount of additional financing available. Failure to obtain sufficient financing may result in delaying, scaling back, eliminating or indefinitely postponing expansion opportunities and the business of the Company's current or future operations. There can be no assurance that additional capital or other types of financing will be available if needed or that, if available, the terms of such financing will be acceptable to the Company. In addition, there can be no assurance that future financing can be obtained without substantial dilution to existing shareholders.

Management of Growth

The Company initially intends to outsource its production to third party manufacturers. After achieving a

certain level of sales, the Company plans to establish its own manufacturing facilities. The Company may be subject to growth-related risks including capacity constraints and pressure on its internal systems and controls. The ability of the Company to manage growth effectively will require it to continue to implement and improve its operational and financial systems and to expand, train and manage its employee base. The inability of the Company to deal with this growth may have a material adverse effect on the Company's business, financial condition, results of operations and prospects.

Inability to protect intellectual property

The Company's success is heavily dependent upon its intangible property and technology. The Company relies upon copyrights, patents, trade secrets, unpatented proprietary know-how and continuing innovation to protect the intangible property, technology and information that are considered important to the development of the business. The Company relies on various methods to protect its proprietary rights, including confidentiality agreements with consultants, service providers and management that contain terms and conditions prohibiting unauthorized use and disclosure of confidential information. Third parties may attempt to copy or replicate intangible property, technology or processes. There can be no assurances that the steps taken by the Company to protect its intangible property, technology and information will be adequate to prevent misappropriation or independent third-party development of the Company's intangible property, technology or processes. It is likely that other companies can duplicate a production process similar to the Company's. To the extent that any of the above would occur, revenue could be negatively affected, and in the future, the Company may have to litigate to enforce its intangible property rights, which could result in substantial costs and divert management's attention and other resources.

The Company's ability to successfully implement its business plan depends in part on its ability to obtain, maintain and expand its intellectual property portfolio. If the Company's efforts to protect its intellectual property are unsuccessful or inadequate, or if any third party misappropriates or infringes on its intellectual property, the value of its technology and brand may be harmed, which could have a material adverse effect on the Company's business and might prevent its technology and brand from achieving or maintaining market acceptance.

Internal Controls

Effective internal controls are necessary for the Company to provide reliable financial reports and to help prevent fraud. Although the Company will undertake a number of procedures and will implement a number of safeguards, in each case, in order to help ensure the reliability of its financial reports, including those imposed on the Company under Canadian securities law, the Company cannot be certain that such measures will ensure that the Company will maintain adequate control over financial processes and reporting. Failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm the Company's results of operations or cause it to fail to meet its reporting obligations. If the Company or its auditors discover a material weakness, the disclosure of that fact, even if quickly remedied, could reduce the market's confidence in the Company's consolidated financial statements and materially adversely affect the trading price of the Common Shares.

Breach of confidentiality

While discussing potential business relationships or other transactions with third parties, the Company may disclose confidential information relating to the business, operations or affairs of the Company. Although confidentiality agreements are to be signed by third parties prior to the disclosure of any confidential information, a breach of such confidentiality agreement could put the Company at competitive risk and may cause significant damage to its business. The harm to the Company's business from a breach of confidentiality cannot presently be quantified but may be material and may not be compensable in damages. There can be no assurance that, in the event of a breach of confidentiality, the Company will be able to obtain equitable measures, such as injunctive relief from a court of competent jurisdiction in a timely manner, if at all, in order to prevent or mitigate any damage to its business that such a breach of

Conflicts of Interest

None of the Company's directors and officers currently serves as directors and/or officers of other companies involved in similar industries to the Company. However, it is possible that certain directors and officers may serve for other companies involved in similar industries to the Company and conflict could arise for such directors and officers in the future. Any Company-related decision made by any of these directors and officers involving the Company should be made in accordance with their duties and obligations to deal fairly and in good faith and to act in the best interests of the Company and its shareholders, however there can be no assurance that such conflicts will not adversely affect the Company.

Legal claims and other contingencies

There are no legal claims or proceedings filed against the Company. However, there is a possibility that the Company and its subsidiaries may become parties to lawsuits and claims arising in the ordinary course of business which could adversely affect the Business. Such lawsuits could result in significant costs and the outcome of such lawsuits could have a material negative impact on the Company's financial position, operating results, or the Company's ability to continue to carry on its business activities.

Difficult to forecast sales

The Company must rely largely on its own market research to forecast sales as detailed forecasts are not generally obtainable from other sources. A failure in the demand for its products to materialize as a result of competition, technological change or other factors could have a material adverse effect on the business, results of operations and financial condition.

As at the date of this MD&A, there are no formal agreements in place for the sale of the Company's products, which increases the risk inherent in the Company's financial projections. There is no guarantee that the Company will achieve sufficient sales revenue to sustain its operations.

Industry risks

Wireless power transmission technology is an advanced technology. The standardization of WPT technology and larger power transmission could be found to have a negative impact on the human body. This may affect the commercialization of WPT technology.

Competition

The Company will likely face intense competition from other companies, some of which have long operating histories and more financial resources and marketing experience than the Company. Increased competition by larger and better financed competitors could materially and adversely affect the proposed business, financial condition and results of operations of the Company. Because of the early stage of the industry in which the Company operates, the Company expects to face additional competition from new entrants. To remain competitive, the Company will require a continued investment in facilities and research and development to be able to compete on costs. The Company may not have sufficient resources to maintain marketing, sales and patient support efforts on a competitive basis which could materially and adversely affect the business, financial condition and results of operations of the Company.

If the Company is unable to continually innovate and increase efficiencies, its ability to attract new customers may be adversely affected.

In the area of innovation, the Company must be able to develop new products that appeal to its customers. This depends, in part, on the technological and creative skills of its personnel and on its ability to protect its intellectual property rights. The Company may not be successful in the development, introduction, marketing, and sourcing of new products, that satisfy customer needs, achieve market acceptance, or generate satisfactory financial returns.

Economic conditions in Korea

PRT Korea Ltd. is incorporated in Korea and most of the Business is currently carried out in Korea. As a result, the Company is subject to political, economic, legal and regulatory risks specific to Korea. Developments that could have an adverse impact on Korea's economy include:

- declines in consumer confidence and a slowdown in consumer spending;
- deterioration in economic or diplomatic relations between Korea and its trading partners or allies, including deterioration resulting from territorial or trade disputes or disagreements in foreign policy (such as the ongoing trade disputes with Japan);
- adverse conditions or developments in the economies of countries and regions that are important export markets for Korea, such as China, the United States, Europe and Japan, or in emerging market economies in Asia or elsewhere, including as a result of deteriorating economic and trade relations between the United States and China and increased uncertainties resulting from the United Kingdom's exit from the European Union;
- the occurrence of severe health epidemics in Korea and other parts of the world, such as the ongoing COVID-19 pandemic;
- adverse changes or volatility in foreign currency reserve levels, commodity prices (including oil prices), exchange rates (including fluctuation of the Canadian dollar, U.S. dollar, Euro or Japanese Yen exchange rates or revaluation of the Chinese Yuan, as well as the impact from the United Kingdom's exit from the European Union on the value of Korean Won), interest rates, inflation rates or stock markets;
- increased sovereign default risk in select countries and the resulting adverse effects on the global financial markets;
- a deterioration in the financial condition or performance of small- and medium-sized enterprises and other companies in Korea due to the Korean government's policies to increase minimum wages and limit working hours of employees;
- investigations of large Korean business groups and their senior management for possible misconduct;
- a continuing rise in the level of household debt and increasing delinquencies and credit defaults by retail and small- and medium-sized enterprise borrowers in Korea;
- the economic impact of any pending free trade agreements or changes in existing free trade agreements; social and labor unrest;
- decreases in the market prices of Korean real estate;
- decrease in tax revenue coupled with a substantial increase in the Korean government's expenditures for fiscal stimulus measures, unemployment compensation and other economic and social programs that would lead to an increased Korean government budget deficit;
- financial problems or lack of progress in the restructuring of Korean business groups, other large troubled companies, their suppliers or the financial sector;
- loss of investor confidence arising from corporate accounting irregularities or corporate governance issues at certain Korean companies;
- increases in social expenditures to support an aging population in Korea or decreases in economic productivity due to the declining population size in Korea;
- geo-political uncertainty and the risk of further attacks by terrorist groups around the world;
- natural or man-made disasters that have a significant adverse economic or other impact on Korea or its major trading partners;
- political uncertainty or increasing strife among or within political parties in Korea;
- hostilities or political or social tensions involving oil producing countries in the Middle East and Northern Africa and any material disruption in the global supply of oil or sudden increase in the price of oil;
- increased reliance on exports to service foreign currency debts, which could cause friction with Korea's trading partners;
- the continued growth of the Chinese economy, to the extent its benefits (such as increased exports to China) are outweighed by its costs (such as competition in export markets or for foreign investment and the relocation of manufacturing bases from Korea to China);

- political or social tensions involving Russia and any resulting adverse effects on the global supply of oil or the global financial markets; and
- an increase in the level of tensions or an outbreak of hostilities between North Korea and Korea or North America.

Foreign Currency Risk

The Company is subject to foreign currency exchange risk which may negatively impact its competitiveness, net sales, net earnings and cash flow driven by movements of the Canadian dollar relative to other currencies. A weakening of the currencies in which the Company generates sales relative to the currencies in which costs are denominated may have a material adverse effect on the Company's net earnings and cash flow. The use of different currencies exposes the Company to the risk of foreign currency fluctuations, which are affected by a number of factors that are beyond the control of the Company. These factors include economic conditions in the relevant country and elsewhere and the outlook for interest rates, inflation and other economic factors. Foreign currency fluctuations may also affect the Company's ability to achieve sales growth. A weakening of foreign currencies in which the Company generates sales relative to the Canadian dollar would decrease its net sales. Accordingly, its reported net earnings may be negatively affected by changes in foreign exchange rates.

Financial instability in other countries

As most of the Business is currently carried out in Korea, the Company may be affected by the impact of financial instability in countries other than Korea. The Korean market and economy are influenced by economic and market conditions of other countries, particularly emerging market countries in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has adversely affected the Korean economy.

Foreign Countries and Political Risk

Most of the Business is carried out in Korea and the Company may expand operations into other foreign countries, where operating activities may be affected in varying degrees by political instability and changes in government regulations such as tax laws, business laws and environmental laws, affecting the Company's business in that country. Any changes in regulations or shifts in political conditions are beyond the control of the Company and may adversely affect its business, or if significant enough, may make it impossible to continue to operate in the country. Operations may be affected in varying degrees by government regulations with respect to restrictions on production, price controls, foreign exchange restrictions, export controls, consumer protection, income taxes and environmental legislation.

Tensions with North Korea

As most of the Business is currently carried out in Korea, the Company is subject to the impact of the tensions between the Republic of Korea and North Korea. Relations between the Republic of Korea and North Korea have been tense throughout Korea's modern history. The level of tension between the two Koreas has fluctuated and may increase or change abruptly as a result of current and future events. In recent years, there have been heightened security concerns stemming from North Korea's nuclear weapons and long-range missile programs and increase uncertainty regarding North Korea's actions, particularly in light of possible response from the international community. There can be no assurance that the level of tension will not escalate further in the future.
