

## Inspiration Energy Plans Exploration Operations at the Newly Acquired Rottenstone North Gold Project

Vancouver, British Columbia – December 5<sup>th</sup>, 2024, Inspiration (“Inspiration” or the “Company”) (CSE: ISP) is pleased to announce that plans are currently being formulated to start exploration operations on the newly acquired Rottenstone North Gold Project (the “Property” or “Gold Project”). Ramp Metals Inc.’s (“Ramp Metals”) (TSX-V: RAMP) news this week (see Ramp Metals’ news release dated Dec 2, 2024) was very encouraging, stating they have discovered new target zones on their discovery. One of these new zones, the Rush target, is directly bordering Inspiration’s Property.

Rottenstone North Gold Project

*"New targets uncovered by Ramp right up against our Property potentially bodes well for our upcoming commencement of exploration programs. This Gold Project is at the right address in Saskatchewan, which is one of the most business and mining friendly regions in the world. This new Property directly borders the exciting discovery of Ramp Metals," stated Charles Desjardins, President of Inspiration, adding, "We look forward to getting boots on the ground, especially in light of this new discovery right at our border. Management is optimistic about the short and long-term growth prospects of Inspiration, and, with less than 15 million shares outstanding, there is tremendous leverage to success for Inspiration shareholders."*

The Project is located within the Rottenstone Domain, a regional northeast-southwest geological corridor, that includes the past-producing Rottenstone nickel/copper/platinum group elements/gold mine, which, from 1965 to 1968, produced approximately 26,057 tonnes of high-grade nickel at 3.28% Ni, 1.83% Cu, and 9.63 g/t Pt+Pd+Au (Saskatchewan Mineral Deposits Index No. 09587).

Inspiration's Gold Project is directly northwest and borders Ramp Metals Inc.'s Rottenstone SW gold project, which reported multiple gold zones from discovery hole Ranger-01, which included 73.55 g/t Au and 19.50 g/t Ag over 7.5 m from 227.0 m, including 182 g/t Au and 60.8 g/t Ag over 1.5 m from 230.0 m (see Ramp Metals' news release dated June 17, 2024). Inspiration's management cautions that results or discoveries on properties in proximity to Inspiration may not necessarily be indicative of the presence of similar mineralization on the Company's properties.

#### **National Instrument 43-101 disclosure**

Dr. Scott Jobin-Bevans, P.Geo. (#0183), and Independent Advisor to the Company, is a Qualified Person as defined by NI 43-101, Standards of Disclosure for Mineral Projects. Dr. Jobin-Bevans has reviewed and approved the technical content in this news release.
