

# Canter Secures Merritt Construction for Gravel Work and Drill Site Preparations

Vancouver, British Columbia--(Newsfile Corp. - March 13, 2024) - **Canter Resources Corp. (CSE: CRC) (OTC Pink: CNRCF) (FSE: 601)** ("**Canter**" or the "**Company**") is pleased to announce that the Company has engaged Merritt Construction Inc., located in Mina, Nevada, to carry out upcoming gravel work and drill site preparations at the Columbus Lithium-Boron Project ("Columbus" or the "Project").

"We are very pleased to be working with an experienced and trusted local contractor, Dick Merritt of Merritt Construction, for our upcoming gravel work and drill site preparations at Columbus," stated Jones Lang, CEO of Canter. "We are committed to sourcing locally and using Nevada-based vendors and suppliers whenever possible, and given Merritt Construction's proximity to the Project, support is readily available on an as needed basis which provides valuable flexibility as we ramp up our activities at site."

Gravel will be sourced from a Bureau of Land Management community gravel pit during the Company's Phase I exploration program. The initial scope of work, which is expected to commence in approximately three weeks, will include gravel transportation and stockpiling at a designated site at Columbus, with select reinforcements to pre-existing roads as the Company concurrently carries out additional sampling and shallow Geoprobe drilling.

In addition to further road reinforcement, Merritt Construction will return to Columbus to complete drill site and sump preparations, as well as supply and store water for the Company's initial exploration well drilling.
