1. NATURE OF OPERATIONS AND GOING CONCERN

Carmanah Minerals Corp. ("Carmanah" or the "Company") was incorporated on October 30, 2020 under the British Columbia Corporations Act of the Province of British Columbia. On June 27, 2022, the Company's shares began trading on the Canadian Securities Exchange (the "CSE") under the symbol "CARM".

The address of the Company and the registered and records office is 2600 - 1066 West Hastings Street, Vancouver, British Columbia V6E 3X1.

The Company is in the exploration stage and its principal business activity is the exploration and evaluation of mineral properties in Canada. The Company is in the process of exploring and evaluating its mineral properties and has not yet determined whether these properties contain reserves that are economically recoverable. As at November 30, 2023, the Company has not yet determined whether its interest in the mineral property contains ore reserves that are economically recoverable. The recoverability of amounts shown for exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying mineral claims, the ability of the Company to obtain the necessary financing to complete the development of and future profitable production from the properties or realizing proceeds from their disposition.

The Company's financial statements for the three and six months ended November 30, 2023 have been prepared on a going concern basis, which contemplates the realization of assets and settlement of liabilities and commitments in the normal course of business. For the six months ended November 30, 2023, the Company incurred a net comprehensive loss of $119,758. As at November 30, 2023, it had an accumulated deficit of $853,673 which has been funded by the issuance of equity. The Company's ability to continue its operations and to realize its assets at their carrying values are dependent upon obtaining additional financing sufficient to cover its operating costs.

Although management is currently seeking additional sources of equity or debt financing, there is no assurance these activities will be successful. If the Company is unable to raise additional capital in the future, management expects that the Company will need to curtail operations, liquidate assets, seek additional capital on less favorable terms and/or pursue other remedial measures. Management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern. These financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the accompanying financial statements.

1. NATURE OF OPERATIONS AND GOING CONCERN (continued)

Statement of Compliance and Basis of Presentation

These condensed interim financial statements have been prepared in accordance with International Accounting Standards 34, Interim Financial Reporting ("IAS 34") using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the IFRS Interpretations Committee ("IFRIC").

The financial statements were approved and authorized for issuance by the Board of Directors on January 18, 2024.

These condensed interim financial statements have been prepared on a historical cost basis, modified where applicable. In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The functional and presentation currency of the Company is the Canadian dollar.

2. SIGNIFICANT ACCOUNTING POLICIES

The Company's accounting policies are the same as those applied in the Company financial statements for the year ended May 31, 2023.

3. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the Company's financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of income and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

Critical Judgments

The following are critical judgments that management has made in the process of applying policies that have the most significant effect on the amount recognized in the financial statements:

<u>Going Concern</u>
The assessment of the Company's ability to continue as a going concern involves critical judgment based on historical experience. Significant judgements are used in the Company's assessment of its ability to continue as a going concern which is described in Note 1.

<u>Exploration and Evaluation Asset</u>
The determination whether there have been any events or changes in circumstances that indicate the impairment of its exploration and evaluation assets.

(Unaudited, Expressed in Canadian Dollars)

4. ACCOUNTING PRONOUNCEMENTS ISSUED BUT NOT YET EFFECTIVE

Accounting standard or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's condensed interim financial statements.

On or before 66 months following the Closing Date	$400,000	$60,000
TOTAL	**$1,000,000**	**$300,000**

Upon the Company delivering the Optionor a notice confirming the satisfaction of $1,000,000 of expenditures and $300,000 payment, the Company had 90 days to pay the Optionor a further $1,500,000 to acquire 100% of the earned interest of the Loljuh Property. The Company could elect to satisfy up to 50% ($750,000) of the option exercised in the issuance of common shares.

The Loljuh Property has a 2% Net Smelter Royalty that can be acquired for $2,000,000.

During the year ended May 31, 2023, the Company tested the property for impairment and recognized an impairment charge of $80,000, reducing the carrying amount to $nil. On August 26, 2023, the Company terminated the Loljuh property option agreement.

Walker Project

On October 5, 2022, the Company entered into a property option agreement to acquire 50% interest of the Walker Creek Claims from Marvel Discovery Corp. ("Marvel"). The property is located in the Athabasca Basin, Saskatchewan.

Trade payable and accrued liabilities	62,846	44,739

Financial Instrument Risk Exposure

The fair value of financial assets and financial liabilities at amortized cost is determined in accordance with generally accepted pricing models based on discounted cash flow analysis or using prices from observable current market transactions. The Company considers that the carrying amount of all its financial assets and financial liabilities recognized at amortized cost in the financial statements approximates their fair value due to the demand nature or short-term maturity of these instruments.

The following table provides an analysis of the Company's financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to 3 based on the degree to which the inputs used to determine the fair value are observable.

Level 1	fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
Level 2	fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly;
Level 3	fair value measurements are those derived from inputs that are unobservable inputs for the asset or liability.

Cash is classified as Level 1. The carrying balance of trade payables approximate their fair value due to their short-term nature.

The Company's financial instruments expose it to a variety of financial risk: market risk (including price risk and interest rate risk), credit risk and liquidity risk. These risks arise from the normal course of operations and all transactions are undertaken to support those operations. Risk management is carried out by management under policies approved by the Board of Directors. Management identifies and evaluates the financial risks in co-operation with the Company's operating units.

12. FINANCIAL INSTRUMENTS (Continued)

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is in its cash. The Company manages credit risk on liquid financial assets through maintaining its cash with high quality financial institutions.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with financial liabilities. The Company has a planning and budgeting process in place by which it anticipates and determines the funds required to support its normal operating requirements.

The Company's ongoing liquidity is impacted by various external events and conditions. The Company expects to repay its financial liabilities in the normal course of operations and to fund future operations and capital requirements through operating cash flows, as well as future equity and debt financing. As at November 30, 2023, the Company had a cash balance of $141,480 to settle current liabilities of $62,846. The Company's financial liabilities include trade payables which have contractual maturities of 30 days or are due on demand.

Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk on its cash. The interest rate risk on cash is not considered significant due to its short term nature and maturity.

13. SUBSEQUENT EVENT

On January 17, 2024, the company issued 2,000,000 common shares and 2,000,000 common share purchase warrants pursuant to a mineral property option described in Note 5.
