

## **CLARIFICATION TO NEWS RELEASE ENTITLED “OroEx Corp. Pre-Approves Great Eagle Gold’s California-Based Cahuilla Gold Project for Tokenization into NatGold Coins”**

**BURNABY, BC / June 27, 2024** / The Canadian Investment Regulatory Organization (“CIRO”), has requested that Great Eagle Gold Corp. ("Great Eagle") (CSE: GEGC | OTC: GEGCF | FRA: GI8) clarify certain information in its press release entitled “OroEx Corp. Pre-Approves Great Eagle Gold’s California-Based Cahuilla Gold Project for Tokenization into NatGold Coins” dated June 24, 2024, (the “June 24 Release”) in regards to certain geological information and resource statements.

Great Eagle stated in the June 24 Release that “The project boasts 1,420,660 indicated gold resources and 82,487 inferred gold resource, qualifying it for the minting of 584,761 NatGold coins with a gross projected baseline intrinsic coin value exceeding US\$560 million.”. Great Eagle wishes to clarify that the foregoing resource numbers referred to in the June 24 Release are in regards to ounces of gold, as indicated in a current technical report dated March 10, 2021, titled “Amended Technical Report on the Cahuilla Project Gold and Silver Resources, Imperial County, California” prepared by Steven D Craig, C.P.G. as lead author, in compliance with National Instrument 43-101. In addition, the coin calculation is determined by the International NatGold Council standards, with each NatGold Coin representing one certified ounce of gold. The detailed outline of this calculation can be found on the International NatGold Council Website at <https://www.natgold.org/about-natgold/faq/>, where there is also a detailed summary of this calculation applicable to the Cahuilla Project. The base line intrinsic coin value is then calculated by taking the 584,761 NatGold Coins from above and multiplying them by the baseline intrinsic value of \$958/certified ounce after resource ratio exchanges are applied.
