### **STEARMAN RETAINS ALS GOLDSPOT**

**VANCOUVER, BRITISH COLUMBIA** – November 21, 2023 – Stearman Resources Inc. (“Stearman” or the “Company”) is pleased to announce that it has retained ALS Goldspot Discoveries Ltd. (“ALS Goldspot”) to perform constrained 3D magnetic inversion, structural interpretation and targeting on the Company's Miniac Property.

ALS GoldSpot will perform the work using the recently acquired high-resolution drone magnetic data collected by the Company earlier this year, along with all other available geophysical and geological data sets including historical drilling and geophysical data. The results of the study will provide an up-to-date structural interpretation with improved geological detail identified by the increased resolution of the geophysical data. Drill targets will be generated based on the combined results of the structural interpretation and 3D magnetic inversion.

ALS GoldSpot is a team of industry experts who combine knowledge in geoscience and data science to deliver bespoke solutions that transform the mineral discovery process. In the race to make discoveries, ALS GoldSpot produces Smart Targets and advanced geological modelling that saves time, reduces costs and provides accurate results.

#### **Miniac Property**

The Miniac Property consists of 78 mining claims (41 square kms) located approximately 35 km north of Amos, Quebec. Drilling on the Property by previous operators intersected prospective intercepts such as 1.05 g/t Au and 0.16% Zn over 4.65 m, and 14.5 g/t Ag, 0.17% Cu and >0.66% Zn over 5.66 m. The mineralization occurs in massive to semi-massive sulphide zones of primarily pyrite with lesser amounts of pyrrhotite, sphalerite, and chalcopyrite.

This geophysical campaign marks the first time that property-wide, closely-spaced, high-resolution geophysics will be performed on the Property, the goal of which is to generate new drill targets to build on the prospective drilling performed in the past.

The NI 43-101 compliant technical report for the Miniac Property is available on SEDAR.

#### **About Stearman Resources Inc.**

Stearman Resources Inc. is a Canadian mineral exploration company based in Vancouver, Canada. The Company is currently focused on performing mineral exploration on the Miniac Property. Stearman entered into an option agreement with J2 Metals Inc. for the option to acquire a 75% interest in the Property.

Raymond Wladichuk, P.Geo. (OGQ #: 02287), is a qualified person as defined by NI 43-101 standards for mineral exploration disclosure and takes responsibility for the technical information contained in this document.

On Behalf of the Company  
Howard Milne, Chief Executive Officer
