

STEADRIGHT APPOINTS EXPERIENCED VICE PRESIDENT OF EXPLORATION

NOT FOR DISTRIBUTION TO UNITED STATES NEWS WIRE SERVICES OR FOR DISSEMINATION IN THE UNITED STATES

November 8th, 2022 – Muskoka, ONT.; Steadright Critical Minerals (CSE: SCM) (“Steadright” or the “Company”) is pleased to announce that Mr. Robert Palkovits, P. Geo, has been appointed Vice President of Exploration, effective immediately.

Robert is a registered professional geologist with the PGO in Ontario. Rob graduated from Cambrian College in 1981 in geology and in 1982 in mining and followed that up with a B.Sc. Geology in 1987 from Laurentian University.

Rob worked in gold exploration prior to joining Vale in 1987. At Vale, he was employed for 30 years in roles that ranged from exploration to mine geology and to underground mine supervision. For the last 15 years at Vale, Rob worked as Chief Geologist in Sudbury at Creighton, North and Garson Mines, and in the Strategic Studies Group.

Rob is experienced with overseeing the management of geology staff, geological modelling, definition and exploration drilling programs and budgets, and the annual updating of mine plans and 43-101 technical reports. In the strategic studies group, Rob was responsible for overseeing geology, geotechnical and metallurgical study deliverables for projects in Manitoba, Sudbury, and Voisey’s Bay in Newfoundland.

Rob joined the RMS team as a Sr. Technical Specialist in 2019 following his retirement from Vale, supporting mine studies for tailings and backfill projects in Canada, the U.S., and Chile. And he continues working in this capacity.

Mr. Palkovits will be a key member of the senior management team of Steadright and lead the company’s technical, exploration and geology activities. Reporting to the Board as Vice President, Rob will be responsible for the planning and directing of the company’s exploration activities and he will lead both the exploration due diligence and the geological technical assessment initiatives.

“We are very fortunate to have someone with Rob’s senior geology experience involved in the early stages with Steadright. With proven exploration management experience, Rob will play a key role in the future growth and success of the company, along with providing technical direction and guidance,” states John Morgan, CEO.

ON BEHALF OF THE BOARD OF DIRECTORS

Exploring for a better tomorrow...

Steadright Critical Minerals Inc. is a junior mining exploration company established in 2019 and incorporated in the Province of Ontario. Steadright currently holds an option on its property, specifically in the Port Cartier, Gaspé Bay Region of Quebec, Canada, accessible by route 138. Steadright’s Quebec project, the RAM Project, is comprised of 4,201 acres. The RAM property is located on a highly prospective geological unit and historically has been underexplored for Ni, Co, Cu and precious metals. Steadright also has an option agreement for the B2 Project exploring for Cu, Ag located in the Saguenay-Lac-St-Jean Region of Quebec.
