

Moss introduces New Gut Microbiome Test

VANCOUVER, British Columbia, Canada - March 28, 2023 - Moss Genomics Inc. ("**Moss**" or the "**Company**") (CSE: MOSS), a consumer genomics and gut microbiome company based in Vancouver, British Columbia announces the introduction of its Gut Microbiome test which can be ordered directly to your home via the Company's online platform. The gut microbiome is home to trillions of microbes that directly influence a person's mood, how they digest food and how their immune system responds to infections or allergens. Our report includes a comprehensive and in-depth analysis of the types and amount of microorganisms present, gut microbiome harmony, disease related microbes insight and obesity risk. We provide personalized solutions to improve the customer's gut health.

In addition, Moss is pleased to announce a proprietary suite of genetic reports which serve to complement our main products. These reports give customers the opportunity to further explore and understand their genetic data. The first report being made available to customers will focus on mental health. Gut health is so closely tied with mental health that the gut is often referred to as our second brain. Psychological factors can impact the way in which your gastrointestinal tract moves and vice versa, and an unhealthy gut can cause you to experience brain fog, low energy levels, anxiety, and depression.

"Actionable health data derived from our gut microbiome test is key to helping customers overcome chronic gut health related problems," said Michelle Lee, President of the Company. "Our new gut microbiome test provides an affordable low-cost entry for new customers to our brand. Our mental health report is part of a series of reports we plan to release over the coming months as we continue to develop and bring to market new and innovative solutions that leverage of our genetic and microbiome sequencing capabilities to improve human health."

Moss has created an online healthcare and technology platform integrating labs, services, and products in a shared economy. Moss provides comprehensive and affordable, at-home genetic and microbiome testing paired with personalized wellness reports and offerings to promote total gut, mind, and body health. The Company's services include health reports, personalized food and nutrition recommendations, and a social media platform that allows customers to form communities based on their specific health needs. The Company's current and anticipated products can be found in the "Shop" section of its [website](#).

For further information concerning Moss and its business, please view the Company's long form prospectus dated December 13, 2022 (the "**Prospectus**") and CSE listing statement dated January 16, 2023 (the "**Listing Statement**") supporting Moss's listing on the CSE, as well as the Company's website at www.mossgenomics.com. Copies of the Prospectus and Listing Statement are available on the Company's SEDAR profile at www.sedar.com.
