The accompanying notes are an integral part of these consolidated financial statements

1. NATURE AND CONTINUANCE OF OPERATIONS

Critical Infrastructure Technologies Ltd. (formerly 1319275 B.C. Ltd.) (the "Company") was incorporated under the British Columbia Business Corporations Act on August 11, 2021. The Company's head office and records and registered office is located at 2600 – 1066 West Hastings Street Vancouver, BC V6E 3X1.

On February 13, 2023, the Company completed the business combination with Critical Infrastructure Technologies Pty Ltd. ("CiTech") that was accounted for as a reverse takeover (Note 5).

The Company has an accumulated deficit of $12,623,868 as at September 30, 2023. The Company's ability to continue its operations is dependent upon obtaining additional financing sufficient to cover its operating costs. All the preceding indicates the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. These consolidated financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the accompanying financial statements.

2. STATEMENT OF COMPLIANCE

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and Interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC").

These consolidated financial statements have been approved for issuance by the Board of Directors on December 7, 2023.

3. BASIS OF PRESENTATION

The consolidated financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit or loss, which are stated at their fair value.

The consolidated financial statements are presented in Canadian dollars, which is also the functional currency of the Company. The functional currency of CiTech is the Australian dollars.

In addition, the consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The preparation of consolidated financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgement of complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

Change in Presentation Currency

As outlined in Note 5, these consolidated financial statements are presented as a continuation of CiTech. Effective July 1, 2021, CiTech changed its presentation currency from Australian Dollars ("AUD") to Canadian Dollars ("CAD") to better reflect the Company's business activities after completion of the reverse takeover (Note 5). In making this change in presentation currency to CAD, the Company followed the guidance in IAS 21 The Effects of Changes in Foreign Exchange Rates and have applied the change retrospectively, as if the AUD had always been CiTech's presentation currency, as follows:

- Assets and liabilities have been translated into the CAD at the rate of exchange prevailing at the respective reporting dates;
- The consolidated statements of loss and comprehensive loss were translated at the average exchange rates for the respective reporting periods, or at the exchange rates prevailing at the applicable transaction date;
- Equity transactions have been translated at the exchange rate prevailing at the date of the transactions; and;
- Exchange differences arising on translation were recorded in accumulated other comprehensive loss in shareholders' equity.

The exchange rate used were as follows:

AUD/CAD exchange rate	September 30, 2023	June 30, 2023
Closing at the reporting date	0.87	0.8814
Average rate for the year	0.8757	0.9016

Basis of Consolidation

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, CiTech. Inter-company balances and transactions are eliminated on consolidation.

4. SIGNIFICANT ACCOUNTING POLICIES

(a) Cash

Cash is carried in the statement of financial position at amortized cost.

(b) Income taxes

Income tax is recognized in profit or loss except to the extent that it relates to items recognized in other comprehensive income or loss or directly in equity, in which case it is recognized in other comprehensive income or loss or equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at year end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the end of the reporting period applicable to the period of expected realization or settlement.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the group intends to settle its current tax assets and liabilities on a net basis.

(c) Share capital

Common shares are classified as shareholders' equity. Transaction costs directly attributable to the issue of common shares and share purchase options are recognized as a deduction from equity, net of any tax effects.

(d) Basic and diluted loss per share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the year. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive. Contingently issuable shares are not considered outstanding common shares and consequently are not included in loss per share calculations.

(e) Financial instrument measurement and valuation

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1	Unadjusted quoted prices in active markets for identical assets or liabilities;
Level 2	Inputs other than quoted prices that are observable for the assets or liability either directly or indirectly; and
Level 3	Inputs that are not based on observable market data.

The measurement of the Company's financial instruments is disclosed in Note 16 to these consolidated financial statements. Any financial instrument that is valued using level 2 or 3 inputs will involve estimation uncertainty.

Financial assets

The Company classifies its financial assets in the following categories: at fair value through profit or loss ("FVTPL"), at fair value through other comprehensive income ("FVTOCI") or at amortized cost. The determination of the classification of financial assets is made at initial recognition. Equity instruments that are held for trading (including all equity derivative instruments) are classified as FVTPL; for other equity instruments, on the day of acquisition the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate them as at FVTOCI.

The Company's accounting policy for each of the categories is as follows:

Financial assets at FVTPL: Financial assets carried at FVTPL are initially recorded at fair value and transaction costs are expensed to profit or loss. Realized and unrealized gains and losses arising from changes in the fair value of the financial assets held at FVTPL are included in profit or loss in the period.

Financial assets at FVTOCI: Investments in equity instruments at FVTOCI are initially recognized at fair value plus transaction costs. Subsequently they are measured at fair value, with gains and losses arising from changes in fair value recognized in other comprehensive income (loss) in which they arise.

Financial assets at amortized cost: A financial asset is measured at amortized cost if the objective of the business model is to hold the financial asset for the collection of contractual cash flows, and the asset's contractual cash flows are comprised solely of payments of principal and interest. They are classified as current assets or non-current assets based on their maturity date and are initially recognized at fair value and subsequently carried at amortized cost less any impairment.

Impairment of financial assets at amortized cost: The Company assesses all information available, including on a forward-looking basis, the expected credit losses associated with its assets carried at amortized cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk. To assess whether there is a significant increase in credit risk, the Company compares the risk of a default occurring on the asset as the reporting date, with the risk of default as at the date of initial recognition, based on all information available, and reasonable and supportive forward-looking information.

Financial liabilities and equity: Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement. An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued are recorded at the proceeds received, net of direct issue costs.

The Company's financial assets and liabilities are classified as follows:

	Classification
Cash	Amortized cost
Other receivables	Amortized cost
Trade and other payables	Amortized cost
Loan and borrowings	Amortized cost
Convertible loan notes	Amortized cost

(f) Intangible assets

Intangible assets acquired as part of a business combination, other than goodwill, are initially measured at their fair value at the date of the acquisition. Intangible assets acquired separately are initially recognised at cost. Indefinite life intangible assets are not amortised and are subsequently measured at cost less any impairment. Finite life intangible assets are subsequently measured at cost less amortisation and any impairment. The gains or losses recognised in profit or loss arising from the derecognition of intangible assets are measured as the difference between net disposal proceeds and the carrying amount of the intangible asset. The method and useful lives of finite life intangible assets are reviewed annually. Changes in the expected pattern of consumption or useful life are accounted for prospectively by changing the amortisation method or period.

Research costs are expensed in the period in which they are incurred. Development costs are capitalised when it is probable that the project will be a success considering its commercial and technical feasibility; the Company is able to use or sell the asset; the Company has sufficient resources and intent to complete the development; and its costs can be measured reliably. Capitalised development costs are amortised on a straight-line basis over the period of their expected benefit, being their finite life of 4 years, beginning on the date they become available for use in the manner intended by management.

(g) Impairment of non-financial assets

Non-financial assets are reviewed at each reporting date to identify circumstances indicating occurrence of impairment loss or reversal of previous impairment losses, if any. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost to sell and value in use. Reversal of impairment loss is restricted to the original cost of the asset.

(h) Leases

At inception of a contract, the Company assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Leases of right-of-use assets are recognized at the lease commencement date at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined, and otherwise at the Company's incremental borrowing rate. At the commencement date, a right-of-use asset is measured at cost, which is comprised of the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any decommissioning and restoration costs, less any lease incentives received.

Each lease payment is allocated between repayment of the lease principal and interest. Interest on the lease liability in each period during the lease term is allocated to produce a constant periodic rate of interest on the remaining balance of the lease liability. Except where the costs are included in the carrying amount of another asset, the Company recognizes in profit or loss (a) the interest on a lease liability and (b) variable lease payments not included in the measurement of a lease liability in the period in which the event or condition that triggers those payments occurs. The Company subsequently measures a right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses; and adjusted for any remeasurement of the lease liability. Right-of-use assets are depreciated over the shorter of the asset's useful life and the lease term, except where the lease contains a bargain purchase option a right-of-use asset is depreciated over the asset's useful life.

The Company has elected to exclude non-lease components related to premises leases in the determination of the lease liability. The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of twelve-months or less and leases of low-value assets. The lease payments associated with these leases are charged directly to income on a straight-line basis over the lease term. During the three months ended September 30, 2023 and the year ended June 30, 2023 the total expense related to short term leases was $106,809 and $450,748, of which $96,128 and $405,968 was capitalized as development costs.

(i) Foreign currency translation

The functional currency is the currency of the primary economic environment in which an entity operates and may differ from the currency in which the entity conducts transactions.

Transactions in currencies other than the functional currency are translated to the functional currency at exchange rates prevailing on the dates of the transactions. Monetary assets and liabilities that are denominated in currencies other than the functional currency are translated to the functional currency using the exchange rate prevailing on the date of the consolidated statement of financial position, while non-monetary assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation of foreign currency-denominated transactions or balances are recorded as a component of profit or loss in the period in which they occur.

Exchange gains and losses arising from the translation of foreign currency-denominated transactions or balances are recorded as a component of profit or loss in the period in which they occur.

The results of operations and financial position of a subsidiary where the functional currency is different from the presentation currency are translated as follows: assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position; expenses are translated at the average exchange rate for the year, all resulting exchange differences are recognized in other comprehensive income or loss. On disposition or partial disposition of a foreign operation, the cumulative amount of any respective exchange difference is recognized in profit or loss.

(j) Share-based compensation

The fair value method of accounting is used for share-based payment transactions. Under this method, the cost of stock options and other share-based payments is recorded based on the estimated fair value using the Black-Scholes option-pricing model at the grant date and charged to profit over the vesting period. The amount recognized as an expense is adjusted to reflect the number of equity instruments expected to vest.

Upon the exercise of stock options and other share-based payments, consideration received on the exercise of these equity instruments is recorded as share capital and the related share-based payment reserve is transferred to share capital.

Charges for options that are forfeited before vesting are reversed from reserves.

(k) New accounting standards and interpretations not yet mandatory or early adopted

International Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the Company for the annual reporting period ended 30 June 2023. There are no such accounting standards which would impact the Company's consolidated financial statements.

(l) Critical accounting estimates and judgements

The preparation of consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, and expenses. Estimates and associated assumptions applied in determining asset or liability values are based on historical experience and various other factors including other sources that are believed to be reasonable under the circumstances but are not necessarily readily apparent or recognizable at the time such estimate or assumption is made. Actual results may differ from these estimates.

Estimates and underlying assumptions used in determining asset and liability values are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Information about critical accounting estimates and judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the consolidated financial statements are discussed below:

Going Concern

The preparation of the consolidated financial statements requires management to make judgments regarding the going concern of the Company as disclosed in Note 1.

Deferred tax assets and liabilities

The estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and future income tax provisions or recoveries could be affected.

Allowance for expected credit losses

The allowance for expected credit losses assessment requires a degree of estimation and judgement. It is based on the lifetime expected credit loss, grouped based on days overdue, and makes assumptions to allocate an overall expected credit loss rate for each group. These assumptions include recent sales experience, historical collection rates, the impact of the Coronavirus (COVID-19) pandemic and forward-looking information that is available. The allowance for expected credit losses, as disclosed in note 16, is calculated based on the information available at the time of preparation. The actual credit losses in future years may be higher or lower.

Estimation of useful lives of assets

The Company determines the estimated useful lives and related depreciation and amortisation charges for its finite life intangible assets. The useful lives could change significantly as a result of technical innovations or some other event. The depreciation and amortisation charge will increase where the useful lives are less than previously estimated lives, or technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

Impairment of non-financial assets other than goodwill and other indefinite life intangible assets

The Company assesses impairment of non-financial assets other than goodwill and other indefinite life intangible assets at each reporting date by evaluating conditions specific to the company and to the particular asset that may lead to impairment. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves fair value less costs of disposal or value-in-use calculations, which incorporate a number of key estimates and assumptions.

Research and development expenses

The determination of whether expenditures on research and development activities meet the criteria for capitalization as internally generated intangible assets is subject to significant judgement. The Company has determined that until such time that a project can demonstrate its commercial and technical feasibility, the Company is able to use or sell the asset, the Company has sufficient resources and intends to complete the development and its costs can be reliably measured, it will remain in the research phase and accordingly expenditures will be recognized as expenses on the consolidated statements of loss and comprehensive loss. The application of each of these criteria is subject to significant inherent judgement.

5. REVERSE TAKEOVER

On December 14, 2021, the Company signed a Share Purchase Agreement ("SPA") with CiTech, as subsequently amended, by which the Company acquired all of the issued and outstanding shares of CiTech in exchange for common shares of the Company (the "Transaction"). CiTech is an Australian company focused on developing communications products for the mining, emergency service, defence and government sectors.

The Share Purchase Agreement closed on February 13, 2023, and the Company issued 48,135,399 common shares of the Company to the shareholders of CiTech for all of the issued and outstanding shares of CiTech. The substance of the transaction was a reverse takeover of the non-operating company and the transaction does not constitute a business combination as the Company does not meet the definition of a business under IFRS 3. As a result, the transaction was recorded by the Company as a reverse takeover that was not a business combination with a recognition of a listing expense which represented the difference between the fair value of consideration CiTech paid and the fair value of the Company's net assets.

(Expressed in Canadian dollars)

On February 8, 2023, the Company closed a private placement of special warrants (the "Special Warrant Financing"), which resulted in 4,062,500 special warrants being issued at a price of $0.30 per special warrant, raising an aggregate amount of $1,218,750. On February 12, 2023, the special warrants of the Company were converted into 4,062,500 common shares in the capital of the Company.

CiTech, the legal subsidiary, has been identified as the accounting acquirer and the Company, the legal parent, has been identified as the accounting acquiree. As CiTech was deemed to be the acquirer for accounting purposes, its assets, liabilities, and operations since incorporation are included in these consolidated financial statements at their historical carrying value. The Company's results of operations have been included from February 13, 2023, the date of the completion of the Transaction.

The fair value of the consideration was calculated as the fair value of the equity interests that CiTech would have had to issue to give the owners of CiTech the same percentage of equity interest in the combined entity that results from the reverse acquisition. This was estimated to be $12,622,992 calculated as follows:

- The fair value of 48,135,399 common shares was determined to be $10,572,750 based on the fair value of the Company's shares on the closing date.
- The fair value of 300,000 stock options were valued at $67,500 using the Black-Scholes option pricing model using the following weighted average assumptions: an annualized volatility of 100%; an expected life of 4.27 years; a dividend yield of 0%; and risk-free rate of 3.23%.
- The fair value of 10,673,902 warrants were valued at $1,982,742 using the Black-Scholes option pricing model using the following weighted average assumptions: an annualized volatility of 100%; an expected life of 2.91 years; a dividend yield of 0%; and risk-free rate of 3.62%.

Identifiable net assets acquired	
Cash	387,218
Trade and other receivables	320,000
Loan receivable	500,000
Trade and other payables	(110,714)
Total identifiable net assets acquired	1,096,504
Listing expense	11,526,488

Loan receivable of $500,000 is from CiTech which was eliminated upon completion of the reverse takeover (Note 5).

(Expressed in Canadian dollars)

6. CASH

	Sept 30, 2023	June 30, 2023
	$	$
Cash at bank – Australia	167,938	261,432
Cash at bank – Canada	9,923	131,427
Cash on hand	956	969
Ending balance	**178,817**	**393,828**

7. TRADE AND OTHER RECEIVABLES

	Sept 30, 2023	June 30, 2023
	$	$
Goods and Services Tax receivable	342,251	322,742
Research and development rebate receivable	-	-
Ending balance	**342,251**	**322,742**

8. INTANGIBLE ASSETS

	Sept 30, 2023	June 30, 2023
	$	$
Research and development expenditure		
Beginning balance	3,298,216	1,339,082
R&D Tax Incentive Rebate received	(929,158)	-
Addition	481,460	2,016,049
Foreign exchange	-	(56,915)
Ending balance	**2,850,518**	**3,298,216**

As at September 30, 2023 and June 30, 2023, all intangible assets relate to capitalized developments costs on the Company's sole product in development (the Nexus 16), and are not being amortized because they are not yet available for use in the manner intended by management.

(Expressed in Canadian dollars)

9. TRADE AND OTHER PAYABLES

12. RELATED PARTY TRANSACTION

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

Key management personnel include persons having the authority and responsibility for planning, directing, and controlling the activities of the Company as a whole. The Company has identified its directors and certain senior officers as its key management personnel and the compensation costs for key management personnel and companies related to them are recorded at their exchange amounts as agreed upon by transacting parties.

Related party	Relation	Transaction with related party
Junior Jay Pty Ltd ATF The JJC Consulting Services Trust	Associated company controlled by CEO	1. Total	**10,673,902**	**$0.30**	

14. MANGEMENT OF CAPITAL

The Company defines capital as consisting of shareholder's equity (comprised of issued share capital, reserve, and deficit). Management's objective is to provide investment management services to shareholders which includes investing in marketable securities for the purpose of returns in the form of investment income and capital appreciation, as well as the ability to meet its on-going operational obligations as they become due. The Company manages its capital structure to maximize its financial flexibility making adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets and business opportunities. The Company does not presently utilize any quantitative measures to monitor its capital, but rather relies on the expertise of the Company's management to sustain the future development of the business. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. As at September 30, 2023, the Company is not subject to any externally imposed capital requirements or debt covenants. There were no changes in the Company's approach to managing capital during the year.

15. FINANCIAL INSTRUMENTS

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Market Risk

Market risk is the risk that the fair value or future cash flows from a financial instrument will fluctuate because of changes in market prices or prevailing conditions. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk and are disclosed as follows:

(i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company holds no financial instruments that are denominated in a currency other than the Company and CITP's functional currencies. As at September 30, 2023, the Company is not exposed to currency risk.

(ii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in interest rates. The Company's sensitivity to interest rates relative to its cash balances is currently immaterial. The Company also has no long-term debt with variable interest rates, so it has no negative exposure to changes in the market interest rate.

(iii) Price rate risk

The Company has no exposure to price risk with respect to equity prices as the Company is not listed. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market.

Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and trade and other receivables. The Company limits the exposure to credit risk by only investing its cash with high-credit quality financial institutions. Tax and other receivables consist of refundable sales taxes and rebates from government agencies. Management believes that the credit risk related to its cash and trade and other receivables is negligible.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. As at September 30, 2023, the Company has a cash balance of $178,817 and current liabilities of $903,905 (net of Tax and other receivables). As such, the Company has insufficient cash to fund corporate overhead costs for the next year. The Company likely has insufficient funds from which to finance any identified business acquisition and as such will require additional financing to accomplish the Company's long-term strategic objectives. Future funding may be obtained by means of issuing share capital and/or debt financing. There can be no certainty of the Company's ability to raise additional financing through these means. If the Company is unable to continue to finance itself through these means, it is possible that the Company will be unable to continue as a going concern. Consequently, the Company is exposed to liquidity risk as at September 30, 2023.

Fair Value Measurements

The carrying value of cash and cash equivalents, trade and other receivables, loan receivable, trade and other payables, loan and borrowings and convertible loan notes approximate their fair value due to the short-term maturity of these financial instruments.

16. SEGMENTED INFORMATION

The Company operates as a single segment, being the development of communications products for the mining, emergency service, defence, and government sectors. All long-lived assets are located in Australia.

17. COMMITMENT

On April 30, 2022, the Company and Alke Capital Limited ("Alke") entered into an arm's length transaction with Alke ("Alke Agreement"). Pursuant to the Alke Agreement, Alke will (a) provide certain advisory services to the Company ("Alke Advisory Services"), and (b) make available to the Company an equity drawdown facility in the aggregate amount of up to $5,000,000 (the "Funding Commitment"). The Funding Commitment is for an aggregate amount of up to $5,000,000 and a term of three years. In addition, the Company may use the Funding Commitment as security, with the consent of Alke, to secure additional financing avenues if it so chooses. Upon Listing and assuming the satisfaction of other condition precedents as stated in the Alke Agreement (the "Alke Condition Precedents"), the Company can immediately start drawing down funds from the Funding Commitment, assuming that there is sufficient trading volume in the Resulting Issuer Shares on the CSE (the "Trading Volume"), during the three-year term at the Company's discretion by providing a notice to Alke (an "Alke Drawdown Notice"). As at September 30, 2023 and June 30, 2023, there had been $Nil withdrawn from the facility.

18. SUBSEQUENT EVENT

The Company is not aware of any disclosable subsequent events as of the date of issuance of these interim consolidated financial statements.
