1. Entity information

Rush Rare Metals Corp. (“Rush” or the “Company”) was incorporated on October 28, 2021, under the Business Corporations Act (British Columbia). The Company’s registered and records office is located at #600 -1090 West Georgia Street, Vancouver, British Columbia.

The Company is an early-stage entity focused on exploration of mineral sites with a view of commercialization. The Company has acquired the rights to mineral exploration properties within the Province of Quebec in Canada and the State of Wyoming in the United States (Note 3). Effective January 26, 2022, the Company’s shares trade on the Canadian Securities Exchange (“CSE”) under the symbol “RSH”. On March 16, 2023, the Company changed its name to Rush Rare Metals Corp.

2. Basis of presentation

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and with the interpretations of the International Financial Reporting Standards Interpretations Committee (“IFRIC”).

The condensed consolidated interim financial statements for the six months ended December 31, 2023, were authorized for issuance by the Company’s board of directors on February 28, 2024.

(b) Basis of preparation

These consolidated financial statements have been prepared on a historical cost basis except for financial instruments at fair value through profit or loss (“FVTPL”) which are measured at fair value.

(c) Basis of consolidation

These consolidated financial statements include the accounts of the Company and its wholly owned subsidiary. The Company’s subsidiary is an entity controlled by the Company, and the Company has power over the entity through its exposure and rights to variable returns from the subsidiary. The results of the Company’s wholly owned subsidiary, Rush Uranium Wyoming LLC, are included in these consolidated financial statements. The financial statements of the Company’s subsidiary are prepared for the same reporting period as the Company and all intercompany transactions and balances have been eliminated.

(UNAUDITED)

2. Basis of presentation (continued)

(d) Going concern

The Company is in the process of exploring its mineral property interests and has not yet determined whether they contain mineral reserves that are economically recoverable. The Company's continuing operations and the underlying value and recoverability of the amounts shown for the investment in its mineral property interests is entirely dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of the investment in these properties, obtaining the necessary permits to mine, and on future profitable production or proceeds from the disposition of the mineral property interest.

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. Several adverse conditions cast significant doubt on the validity of this assumption. The Company has incurred a net loss during the six months ended December 31, 2023, of \$228,099, has accumulated losses of \$849,975 since incorporation, has limited resources, no sources of operating cash flows and no assurances that sufficient funding will be available to continue operations for an extended period of time.

The application of the going concern concept is dependent upon the Company's ability to satisfy its liabilities as they become due and to obtain the necessary financing to complete the exploration and development of its mineral property interests, the attainment of profitable mining operations or the receipt of proceeds from the disposition of its mineral property interests. Management will seek to raise the necessary capital to meet its funding requirements. There can be no assurance that management's plan will be successful. These uncertainties cast significant doubt about the Company's ability to continue as a going concern.

If the going concern assumption were not appropriate for these consolidated financial statements, then adjustments may be necessary to the carrying value of assets and liabilities, the reported expenses, and the consolidated statement of financial position classifications used. Such adjustments could be material.

(e) Functional and presentation currency

These consolidated financial statements are presented in Canadian dollars, which is the functional currency of the Company and its subsidiary. All financial information has been rounded to the nearest dollar except where otherwise indicated.

2. Basis of presentation (continued)

(f) Use of estimates and judgments

The presentation of consolidated financial statements in accordance with IFRS requires management to make estimates, judgments and assumptions that affect the Company's accounting policies to facilitate the reporting of the Company's assets, liabilities, and expenses during the period.

Estimates and related assumptions are reviewed regularly, on an ongoing basis, and revisions to such estimates are recognized prospectively in the period of revision.

Areas in which management has made critical judgment in the process of applying its accounting policies that have the most significant effect on the amounts recorded in the Company's consolidated financial statements include the determination of the Company's functional currency and the ability of the Company to continue as going concern.

Information about key assumptions and estimation uncertainty that has a significant risk resulting in a material adjustment to the carrying amounts of the Company's assets and liabilities within the next financial year are referenced in the notes to the Company's consolidated financial as follows:

- Note 2(d): The assessment of the Company to continue as a going concern;
- Note 3(b): Estimates of the measurement, valuation and period of use of the Company's mineral property interests;
- Note 3(e): Estimates of Black-Scholes Model inputs to estimate the value of the Company's share-based payment transactions;
- Note 3(f): Estimates and assessment of the recoverability of unused tax losses and deductible temporary differences.
