

Neotech Metals Stakes Strategic Foothills REE Prospect in Central British Columbia

Vancouver, British Columbia--(Newsfile Corp. - January 30, 2024) - **Neotech Metals Corp. (CSE: NTMC) (OTCQB: NTMFF) (FSE: V690)** ("**Neotech**" or the "**Company**"), a mineral exploration company, is pleased to announce the staking of the Foothills REE prospect located 95 km northeast of Kelowna, in Central British Columbia. The region features year-round access via maintained roads and local communities, services, and other infrastructure. The nine claims total 16,517 hectares.

The focus on the mentioned area originated from a recent release by the British Columbia Geological Survey, which highlighted the region as having promising indicators based on a study that employed multi-element stream-sediment geochemical data. This methodology has previously led to significant discoveries (e.g., Brummer et al. 1987).

The areas that have been staked exhibit concentrations of rare-earth elements that surpass background levels by multiples. These heightened concentrations are deemed to be potentially indicative of the presence of mineralization, making the area a compelling prospect for further exploration. The Company will carry out exploration activities to both verify the historical results and expand its knowledge and understanding of the region.

The recent BCGS (January, 2024) publication can be found [here](#).
