Management Discussion & Analysis:

Management’s discussion and analysis (“MD&A”) provides a detailed analysis of the results and financial condition of Formation Metals Inc. (the “Company” or “Formation”) for the three months ended June 30, 2024. The following management discussion and analysis, prepared as of August 29, 2024, should be read together with the unaudited interim financial statements for the three months ended June 30, 2024 with the related notes attached thereto and the audited financial statements for the year ended March 31, 2024 with the related notes attached thereto, prepared in accordance with International Financial Reporting Standards (“IFRS”). The MD&A supplements but does not form part of the financial statements. Management is responsible for the preparation of the financial statements and the MD&A for the three months ended June 30, 2024. News releases and previous filings may be found on SEDAR+ at www.sedarplus.ca.

Description of Business:

The Company was incorporated on March 1, 2022, under the laws of British Columbia. The Company’s head office address is 1575 Kamloops Street, Vancouver BC, V5K 3W1, Canada. The registered and records office address is 400 – 1681 Chestnut Street, Vancouver BC, V7Y 1G5, Canada.

The Company’s principal business activities include the acquisition and exploration of mineral property assets. On March 10, 2022, the Company entered into an Arrangement Agreement (the “Arrangement”) with USHA to transfer the Nicobat Nickel-Copper-Cobalt property (the “Property”) to the Company whereby USHA shareholders will be issued one (1) share of the Company with respect to every five (5) shares of USHA owned on the share distribution record date (the “Share Distribution Record Date”), which was determined by USHA’s Board of Directors to be April 12, 2023. Pursuant to the arrangement agreement and on the payable date of April 20, 2023, USHA completed the transfer of the Property and distributed 9,480,474 common shares of the Company to the USHA shareholders on a pro rata basis.

Middle East affecting current economic conditions and increasing economic uncertainty. Should one or more of these risks materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, implied, expected or intended. In each instance, forward-looking information should be considered in the light of the accompanying meaningful cautionary statements herein. Formation cautions that forward-looking statements involve risk and uncertainty.

Project Overview

The Company's sole asset is an 85% interest in the Nicobat Nickel-Copper-Cobalt Project and was acquired through an Arrangement Agreement (the "Arrangement") between Usha Resources Ltd. (USHA) and the Company whereby USHA shareholders were to be issued one (1) share of the Company with respect to every five (5) shares of USHA owned on the share distribution record date, which was subsequently determined to be April 12, 2023, in exchange for the Property.

Pursuant to the arrangement agreement and on the payable date of April 20, 2023, USHA completed the transfer of the Property and distributed 9,480,474 common shares of the Company to the USHA shareholders on a pro rata basis. A 2% net smelter royalty (NSR) is held by Emerald Lake Development Corporation (the "Vendor") and Formation has the right to at any time acquire up to 1.5% of the vendor held 2% NSR royalty, free and clear of any liens, charges or encumbrances whatsoever, upon payment of \$CDN 2,000,000 (two million).

The Property consists of 2 combined surface and mining right patents located within Dobie Township, approximately 6 km west of Emo, Ontario and 21 km south of New Gold's Rainy River Mine which hosts the Zone 34 nickel discovery.

Historic exploration work between 1952 and 1972 included over 15,000 metres of drilling, 220 drill holes and numerous bulk samples that identified several non-compliant historic resources with higher-grade nickel zones of interest.

Modern exploration of the Property began with Crystal Lake Mining, which completed a 10-hole 1,860 metre drill program in late 2015. Of note, drillhole A-04-15 confirmed that high-grade nickel-copper shoots existed and were considerably better than previously recorded in the historical drilling. Hole A-04-15 intersected from surface to 63.75 metres a weighted average of 1.05% nickel and 2.18% copper (note that the true width of A-04-15 is materially narrower than the drill hole intersection). Usha Resources then completed a 7-hole 1,439 metre drill program in late 2020 that confirmed previous drill results and tested the potential for adding tonnage and grade.

Formation completed a site visit in November 2023 to substantiate hole locations, outcrops (pit) and review some of the drill core. The Company intends to complete a field program budgeted for \$265,000 that includes a 1,000 metres of drilling in FY25.

Overall Performance

The Company does not generate revenues from operations. The Company's net loss for the three months ended June 30, 2024 was \$15,105 (June 30, 2023: \$22,422).

Summary of Exploration and Corporate Activities

During the three months ended June 30, 2024, the Company did not complete any exploration activities. During the year ended March 31, 2024, the Company completed the following exploration activities:

- A site visit in November 2023 to substantiate hole locations, outcrops (pit) and review some of the drill core. The Company intends to complete a field program budgeted for \$265,000 that includes a 1,000 metres of drilling in FY25.

During the three months ended June 30, 2024, the Company did not complete any corporate activities. During the year ended March 31, 2024, the Company completed the following corporate activities:

- On April 26, 2023, the Company announced the completion of the Arrangement between USHA and the Company whereby the former transferred its 85% interest in the Nicobat Property to the Company in exchange for 9,480,474 common shares.
- On November 3, 2023, the Company closed a non-brokered private placement raising gross proceeds of \$850,000 through the issuance of 17,000,000 units (each a "Unit") at \$0.05 per Unit. Each Unit consists of one common share (each a "Share") of the Company and one transferable common share purchase warrant (each a "Warrant") exercisable at \$0.20 per Share for a period of two (2) years (the "Expiry Date") from the closing date (the "Closing Date") of the Private Placement.
- On November 3, 2023, the Company issued 2,000,000 Units at a deemed price of \$0.05 per Unit, to settle \$100,000 in debt (the "Debt Settlement") with one creditor of the Company, Usha Resources Ltd. Each Unit consisted of one Share and one Warrant, exercisable at \$0.20 per Share until the Expiry Date. The debt was incurred by USHA on behalf of Formation prior to completion of the November 3, 2023 financing and is for costs associated with the Formation's listing including audit, accounting and legal fees, regulatory and filing fees, transfer agent fees, and other office and administrative fees.

The following table summarizes the acquisition and exploration expenditures for the Property for the three months three months ended June 30, 2024:

Critical accounting policies and estimates

The preparation of the interim financial statements in accordance with International Financial Reporting Standards requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements. Actual results could differ from these estimates. A detailed description of these matters, as well as the significant accounting policies adopted by the Company are disclosed in the notes to the interim financial statements for the three months ended June 30, 2024.

Financial Instruments

IFRS 9 establishes three primary measurement categories for financial assets: fair value through profit and loss (“FVTPL”), fair value through other comprehensive income (“FVOCI”) and amortized cost. The basis for classification depends on the entity’s business model and the contractual cash flow characteristics of the instrument.

The Company determines the classification of its financial instruments at initial recognition. Upon initial recognition, a financial asset is classified as measured at: amortized cost, fair value through profit and loss (“FVTPL”), or fair value through other comprehensive income (loss) (“FVOCI”). The

FORMATION METALS INC.
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2024

classification of financial assets is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. A financial liability is classified and measured at amortized cost or FVTPL.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

An equity investment that is held for trading is measured at FVTPL. For other equity investments that are not held for trading, the Company may irrevocably elect to designate them as FVOCI. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives) or the Company has elected to measure them at FVTPL.

The Company classifies its financial instruments as follows:

Asset or Liability	IFRS 9 Classification
Cash	Amortized cost
Receivables	Amortized cost
Accounts payable and accrued liabilities	Amortized cost

Liquidity, Capital Resources and Capital Expenditures

At June 30, 2024, the Company's working capital, defined as current assets less current liabilities, was \$672,022 (March 31, 2024: \$687,148). The Company's ability to continue as a going concern is dependent upon its ability to raise additional capital. The factors considered by management are disclosed in Note 1 of the financial statements. The successful completion of such financing is not guaranteed, and depends on a number of factors, including the general sentiment in the capital markets, the strength of commodities prices and the strength of the local and global economies.

Off-balance sheet arrangements

The Company has no off-balance sheet arrangements.

Financial risk factors

The Company's risk exposures and the impact on the Company's financial statements are summarized below.

Credit risk

Financial instruments that potentially subject the Company to a significant concentration of credit risk consist primarily of cash and interest receivable. The Company limits its exposure to credit loss by placing its cash and G.I.C.'s with major financial institutions.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at June 30, 2024, the Company's cash and receivables exceeded its current liabilities. In order to meet future obligations as they become due, the Company may need to access funding from the issuance of equity securities, the exercise of stock options or through other sources. The Company's access to financing is uncertain and there is no assurance of continued access to equity funding.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and commodity and equity prices.

a) *Interest rate risk*

The Company is exposed to interest rate risk to the extent that the cash maintained at the financial institutions is subject to a floating rate of interest. The interest rate risks on cash and on the Company's obligations are not considered significant.

MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2024

b) Foreign currency risk

The Company is exposed to foreign currency risk on fluctuations related to cash, receivables and accounts payable and accrued liabilities that are denominated in a foreign currency. As at June 30, 2024, the Company did not have any accounts in foreign currencies and considers foreign currency risk insignificant.

c) Price risk

Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

The Company's business and operations could be adversely affected by the outbreak of an epidemic or a pandemic or other health crises, e.g., COVID-19. Global government actions, along with market uncertainty could cause an economic slowdown resulting in a decrease in the demand for metals and have a negative impact on metal prices, as well as possible disruptions to global supply chains. While these effects are expected to be temporary, the duration of the business disruptions internationally and related financial impact cannot be reasonably estimated at this time.

Related Party Transactions

The aggregate amount of expenditures payable to key management personnel consisting of directors, former directors or companies with common directors was as follows:

Name of the Key management personnel	Company's Name	Nature of Transaction	Three months ended June 30, 2024	Three months ended June 30, 2023
Navin Varshney	Individual	Reimbursement	\$ 2,000	\$ 2,000
Deepak Varshney, CEO	Individual	Reimbursement	396	5
Khalid Naeem, CFO	Aterna Advisors Inc.	Accounting fees and reimbursements	8,148	9,975

These transactions were in the normal course of operations and were measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.
