## Blast Resources update on Exploration Events

Vancouver, British Columbia, September 6, 2024 - Blast Resources Inc. ("**Blast**" or the "**Company**") (CSE: BLST), the company wishes to announce that it is preparing to mobilize by helicopter an exploration crew on its Saskatchewan Uranium exploration property located in the southwestern quarter of the world-famous Athabasca basin. The company has identified by available geophysical data that based on noteworthy subsurface structures the exploration team will concentrate on before the winter sets in. The company will provide an update on this phase of exploration in a month or so once the field data has been assembled.

The Company also wishes to announce that it will not be continuing with the Option on the Vernon Hills Cobalt project as preliminary surface evaluation concluded that there is very little chance of their being an economic Cobalt deposit possible at this location. The company's Management believes that precious exploration funds are better spent on the Athabasca Basin.

### **About Blast Resources Inc.**

Blast is a mineral exploration company trading on the Canadian Securities Exchange. The Company has options over mineral exploration projects in Saskatchewan. The project in Saskatchewan is located near Highway 955 south of Wales Lake and sits just outside the southwest margin of the Athabasca Basin. The properties sit in geographic proximity to the Patterson Lake Corridor which contains two known Uranium ore bodies. This area of Saskatchewan is the center of intense geologic exploration over the last couple of years due to the number economic and near economic discoveries of Uranium Oxide(U3O8) and the great grades that are being discovered.
