

# Kobrea Commences Field Work at Upland Copper

Vancouver, British Columbia--(Newsfile Corp. - June 17, 2024) - Kobrea Exploration Corp. (CSE: KBX) (FSE: F3I) (OTCQB: KBXFF) ("Kobrea" or the "Company") is pleased to announce that field crews have initiated exploration activities at the Upland Copper Project ("Upland Copper" or the "Project"). The 5,300 hectare, road-accessible project is located 20 kilometres northeast of the town of Barriere and 20 kilometres south of the Taseko Mines Limited's Yellowhead Project in south-central British Columbia. Upland Copper is host to a copper-dominant, remobilized polymetallic volcanogenic massive sulphide deposit that is open for expansion.

Crews will be completing soil geochemical and passive seismic surveys over the area of historically defined copper mineralization. The soil geochemical survey has been designed to infill historical geochemical surveys and to provide multi-element and precious metal analytical results that have not been collected in the past. The data will aid in targeting higher-grade copper domains as well as precious-metals rich domains which have been intersected in historical drilling. Passive seismic surveys will be completed to ascertain overburden depth where the Company intends to complete future trenching and drilling activities.

## About the Upland Copper Project

The Upland Copper Project is located in south-central British Columbia, Canada. The project is host to a bulk-tonnage, remobilized polymetallic volcanogenic massive sulphide deposit that is open to expansion. Historical drilling indicates that mineralization is open to depth, with numerous holes bottoming in copper mineralization including drill hole P-70-9 which averaged 0.32% over the entire 74 metres of the hole. The deepest drilling to date reached a depth of 235 metres.

A 3,700 metre by 1,000 metre area of anomalous copper-in-soils extends south beyond historical drilling approximately 1.5 kilometres, with large portions of the copper-in-soil anomaly untested by drilling. Induced Polarization (IP) surveys completed by previous operators have outlined a 4.0 by 1.2-kilometre chargeability high anomaly that further supports the upside exploration potential of the system.

## Qualified Person

The scientific and technical information in this news release has been reviewed by Rory Ritchie, P.Geo., Chief Geologist and Director of Kobrea Exploration Corp. and a Qualified Person under National Instrument 43-101. The results contained in this release were completed by previous operators of the Property and the Company has not verified such historical results. Although the Company was not involved in the original work in respect of these results, proper industry data verification procedures appear to have been followed.

## Forward-Looking Statements

*This press release contains certain forward-looking statements within the meaning of applicable securities laws with respect to the Company. These forward-looking statements generally are identified by words such as "believe," "project," "aim," "expect," "anticipate," "estimate," "intend," "strategy," "future," "opportunity," "plan," "may," "should," "will," "would," and similar expressions and in this press release include statements respecting the Company's planned soil geochemical and passive seismic surveys on the Project, and the timing and results thereof; the usefulness of the data generated by such surveys for the Company's future work on the Project; and the upside exploration potential of the Project. Although the Company believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward-looking statements and information because the Company can give no assurance that they will prove to be correct. Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties. Many factors could cause actual future events to differ materially from the forward-looking statements in this press release. The forward-looking statements included in this news release are expressly qualified by this cautionary statement. The forward-looking statements and information contained in this news release are made as of the date hereof and the Company undertakes no obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable laws.*
