

Kobrea Receives Exploration Permits for Upland Copper Project

Vancouver, British Columbia--(Newsfile Corp. - July 24, 2024) - Kobrea Exploration Corp. (CSE: KBX) (FSE: F3I) (OTCQB: KBXFF) ("**Kobrea**" or the "**Company**") is pleased to announce it has received permits to undertake exploration activities at the Upland Copper Project ("**Upland Copper**" or the "**Project**"). The 5,300 hectare, road-accessible project is located 20 kilometres northeast of the town of Barriere and 20 kilometres south of the Taseko Mines Limited's Yellowhead Project in south-central British Columbia. Upland Copper is host to a copper-dominant, remobilized polymetallic volcanogenic massive sulphide deposit that is open for expansion.

The British Columbia Ministry of Energy, Mines and Low Carbon Innovation has approved Kobrea's exploration plan as laid out in its permit application and has issued permits to the Company. The permitted activities include diamond drilling, trenching and construction of excavated trail to access drill sites and trench locations.

Crews are presently on the Project completing additional passive seismic surveys (*refer to Kobrea's June 12, 2024 news release for details*) to prepare for upcoming trenching activities. Trenching will begin subsequent to collection and processing of passive seismic survey data.

About the Upland Copper Project

The Upland Copper Project is located in south-central British Columbia, Canada. The Project is host to a bulk-tonnage, remobilized polymetallic volcanogenic massive sulphide deposit that is open to expansion. Historical drilling indicates that mineralization is open to depth, with numerous holes bottoming in copper mineralization, including drill hole P-70-9, which averaged 0.32% over the entire 74 metres of the hole. The deepest drilling to date reached a depth of 235 metres.

A 3,700 metre by 1,000 metre area of anomalous copper-in-soils extends south beyond historical drilling approximately 1.5 kilometres, with large portions of the copper-in-soil anomaly untested by drilling. Induced Polarization (IP) surveys completed by previous operators have outlined a 4.0 kilometre by 1.2 kilometre chargeability high anomaly that further supports the upside exploration potential of the system.

**All historical exploration at the Project has not been verified by the Company and the historical exploration information in this news release is sourced entirely from the independent technical report entitled "Technical Report on the Upland Copper Project" dated June 13, 2023, prepared for the Company by Sean Butler, P. Geo.*

Qualified Person

The scientific and technical information in this news release has been reviewed by Rory Ritchie, P. Geo., Chief Geologist and Director of Kobrea Exploration Corp. and a Qualified Person under National Instrument 43-101.

Forward-Looking Statements

This press release contains certain forward-looking statements within the meaning of applicable securities laws with respect to the Company, including statements respecting the Company's planned work program at the Project. These forward-looking statements generally are identified by words such as "believe," "project," "aim," "expect," "anticipate," "estimate," "intend," "strategy," "future," "opportunity," "plan," "may," "should," "will," "would," and similar expressions. Although the Company believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward-looking statements and information because the Company can give no assurance that they will prove to be correct. Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties. Many factors could cause actual future events to differ materially from the forward-looking statements in this press release. The forward-looking statements included in this news release are expressly qualified by this cautionary statement. The forward-looking statements and information contained in this news release are made as of the date hereof and the Company undertakes no obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable laws.

The Canadian Securities Exchange has not reviewed this press release and does not accept responsibility for the adequacy or accuracy of this news release.
