

# **Black Gold Exploration Expands Acreage in Joint Venture with LGX Energy**

## *Acquisition Targets Key Oil and Gas Leases in Indiana's Clay and Vigo Counties*

**Vancouver, British Columbia, Canada – October 22, 2024** BGX – Black Gold Exploration Corp. (“**Black Gold**” or the “**Company**”) (CSE: **BGX**) (FSE: **P30**) is pleased to announce the addition of 822 acres to the package of oil, gas and mineral leases in Clay County and Vigo County, Indiana that are subject to its ongoing joint venture with LGX Energy Corp. (“**LGX**”), bringing the total leased acreage subject to the JV to 911.9 acres (the “**Leases**”). When originally announced on August 7, 2024, the leased land package covered only 89.9 acres. This additional land package highlights LGX’s confidence in the JV and sets the stage for a strong long-term working relationship between the parties and success in these regions. The added acreage also strengthens Black Gold’s indirect foothold in one of the most promising oil-producing regions in the Midwest, where LGX is currently producing and is actively engaged in further exploration efforts.

The acreage is strategically located near LGX’s existing production assets. LGX is utilizing its extensive proprietary 2D seismic data and has now initiated advanced 3D seismic exploration to identify high-potential drilling sites on the Leases, with the goal of significantly boosting oil and gas output in these key counties.

### **Oil and Strategic U.S. Investment Opportunities**

With the ongoing conflict in the Middle East, the demand for stable and secure energy sources has intensified. The robust infrastructure in Clay County and Vigo County, combined with LGX’s advanced seismic technology, uniquely positions Black Gold’s joint venture with LGX to take advantage of immediate production opportunities while also setting the stage for future exploration growth. In a volatile energy market, this strategic focus on established regions highlights the potential for sustained returns and enhanced energy security, making it an appealing choice for stakeholders navigating the evolving energy landscape.

*“We are very excited with the larger lease holdings land parcel that LGX Energy Corp. has secured for our joint venture. This acquisition reinforces our commitment to providing stable, domestic energy sources in a market impacted by global instability. We hope that LGX’s advanced exploration efforts with 3D Seismic technology will ensure that we continue to identify high-potential drilling locations,”* said Francisco Gulisano, CEO of Black Gold.

On behalf of the Company,
