

51-102F3
MATERIAL CHANGE REPORT

Item 1 Name and Address of Company

Greenridge Exploration Inc. (the “**Company**”)
250-997 Seymour Street
Vancouver, BC
V6B 3M1

Item 2 Date of Material Change

March 6, 2024.

Item 3 News Release

The news release dated March 6, 2024, was disseminated through GlobeNewswire.

Item 4 Summary of Material Changes

The Company announced that it has engaged Dahrouge Geological Consulting Ltd. to lead future exploration (including drilling) of the Company's Nut Lake Project.

The Company entered into a consulting agreement with Mark Selby (the “**Advisor**”) whereby the Advisor agreed to provide consulting services to the Company.

The Company issued an aggregate of 1,800,000 incentive stock options (“**Options**”) under the Company’s stock option plan, each with an exercise price of CDN\$0.63, to officers, directors and consultants of the Company. Each Option, upon payment of the exercise price, entitles the holder thereof to receive one common share of the Company.

Item 5 Full Description of Material Changes

5.1 Full Description of Material Change

See Item 4 above and the attached news release for a full description of the material change.

5.2 Disclosure for Restructuring Transactions

N/A

Item 6 Reliance on subsection 7.1(2) or (3) of National Instrument 51-102

N/A

Item 7 Omitted Information

None.

Item 8 Executive Officer

Russell Starr, Chief Executive Officer and Director, (778) 897-3388

Item 9 Date of Report

March 6, 2024

Greenridge Exploration Engages Dahrouge Consulting

March 6, 2024

Vancouver, B.C. – Greenridge Exploration Inc. (“Greenridge” or the “Company”) (CSE: GXP | FRA: HW3), is pleased to announce that it has engaged Dahrouge Geological Consulting Ltd. (“Dahrouge”) to lead future exploration (including drilling) of the Company's Nut Lake Project (the “Project”), which is located in Nunavut, Canada. The Project covers approximately 4,036 hectares and includes historical drilling which intersected up to 9ft of 0.69% U₃O₈ including 4.90% U₃O₈ over 1ft from 8ft depth¹.

Dahrouge is a North American mineral exploration, consulting, and project management group with offices in Edmonton and Montreal, Canada, and Denver, Colorado. Dahrouge provides professional geological, logistical and project management services to the world's mining and mineral resource industry including project generation, program design, geophysics, project evaluation, and geology and resource estimations.

Jody Dahrouge, President of Dahrouge, expressed, *“I look forward to partnering with the Greenridge team on the exploration of the Nut Lake Project, where we hope to continue our record of discovery. The Dahrouge team generated a number of projects in Saskatchewan’s Athabasca Basin that led to significant uranium discoveries over the last 15+ years. Optimistically, the Nut Lake Project will provide an opportunity to replicate that success. Our team eagerly anticipates initiating exploration activities later this year.”*

The Project is located approximately 55km north of the Angulak Uranium Deposit² or 180km southwest of Baker Lake, Nunavut in the Yathkyed Basin (a sub-basin of the prolific Thelon Basin) in Nunavut Territory, Canada. The Project consists of three contiguous mineral licences encompassing a total land area of approximately 4,036 hectares (~40km²). The Project hosts high-grade vein-hosted grab samples of up to 4.36% U₃O₈, 53.16 oz/t Ag, 1.15% Pb and 7.0% Ni¹.

Russell Starr, CEO of Greenridge, remarked, *“I am confident that Dahrouge will be instrumental in maximizing the potential of the Nut Lake Project. The Dahrouge team's extensive experience in uranium exploration is expected to be of great value as we look to advance the Project.”*

Appointment of Advisor

The Company is pleased to announce the appointment of Mark Selby as an Advisor to the Company, effective immediately.

Mr. Selby is currently CEO of Canada Nickel Company and was formerly President & CEO of Karora Resources Inc. where he led a team that successfully raised over \$100 million and advanced the Dumont nickel-cobalt project in Quebec, from an initial resource to a fully permitted, construction-ready project.

Mark Selby commented, *“I am excited to join the team at Greenridge Exploration, as the Company represents a unique opportunity in the growing uranium space. With the global demand for uranium, Greenridge is ideally positioned to advance through the next stages of development of its projects, building towards securing a significant link in a critical supply chain for the western world.”*

Mr. Selby has held several senior management positions including companies such as Quadra Mining Ltd., Inco Limited, and Purolator Courier, and he was also a partner at Mercer Management Consulting. Since 2001, he has been recognized as one of the leading authorities on the nickel market. He graduated from Queen's University with a Bachelor of Commerce (Honours) and has also served on the boards of multiple junior mining companies.

“On behalf of myself and the board of directors, we welcome Mr. Selby to our team,” said Chief Executive Officer, Russell Starr. *“With over two decades of global mining experience and 20 years of board experience, Mr. Selby brings us a deep understanding of capital markets and mining knowledge and will undoubtedly deliver value as our Nut Lake and Weyman Projects are advanced”.*

Options Issuance

The Company also announces that it has granted an aggregate of 1,800,000 incentive stock options (“**Options**”) under the Company’s stock option plan, each with an exercise price of CDN\$0.63, to officers, directors and consultants of the Company. Each option, upon payment of the exercise price, entitles the holder thereof to receive one Share of the Company. The Options, and any Shares issued upon the exercise of, will be subject to a hold period of four months in accordance with the policies of the Canadian Securities Exchange.
