

## **BluSky Carbon Hosts Demo Days at Biochar Facility in Arkansas**

OLD SAYBROOK, CT/VANCOUVER, BC / ACCESSWIRE / November 19, 2024 / BluSky Carbon Inc. (CSE: BSKY) (OTCQB: BSKCF) (FWB: QE4 /WKN A401NM) (“BluSky” or the “Company”), an innovative entry into the carbon removal clean technology sector is pleased to announce it has initiated a series of informative demonstration events at its AR1 biochar production facility located in Warren, Arkansas.

The demo day events have been arranged to host executives and key personnel from specially invited organizations to view BluSky’s technology and to provide an opportunity to interact with team members and in-house subject matter experts. Based on initial interest and response, the Company is scheduling multiple opportunities on a monthly basis to accommodate these demonstration sessions.

The intent of these events is to offer insights to address the unique needs or interests of diverse organizations by featuring a number of topics across a suite of core benefits such as carbon reduction, economic development, power generation, job creation, biochar production, and project investment opportunities.

BluSky’s head of Business Development, Greg Pakiela notes, “We are delighted to have attracted the volume of interest that led us to organize and offer these in person events. Nothing compares to actually tangibly being able to watch the Vulcan pyrolysis system in action and to have a chance to meet with our experts to answer in in depth questions unique to a myriad of end-use applications and economic scenarios.

The Company invites expressions of interest to attend an upcoming demo day event from representatives of clean technology equipment buyers, carbon credit purchasers, land management organizations, forestry companies, milling operations, state and national politicians, professional engineering groups, economic development departments, agricultural interests, potential suppliers and vendors, non-profits, technology companies, project financiers, and entrepreneurs, alongside our current and pending partners.

International, national and regional industrial operators in the forestry sector will particularly benefit from understanding how BluSky transforms wood waste into valuable carbon credits along with solutions to improve or remediate soil and water issues while removing climate altering carbon dioxide from the atmosphere. To find out more about [biochar](#) production solutions and contact BluSky to learn how to attend an upcoming demonstration event, please contact:

A short video showing the equipment in operation and offering some insights into the facility, the region, and BluSky’s strategic plan is available on its corporate website: [click here](#).

**About BluSky Carbon Inc.** (CSE: BSKY) (OTCQB: BSKCF) (FWB: QE4 /WKN: A401NM)

BluSky is a renewable energy company that is in the business of putting Carbon back into the ground – right where it belongs! The Company converts organic and industrial waste into [biochar](#), renewable power and carbonate rocks, as well as the development and sale of carbon capture technology. BluSky’s primary objectives are to (1) construct carbon removal equipment; (2) sell the biochar produced by the carbon removal equipment; and (3) sell carbon credits generated from the production of biochar. The Company’s business model is based on the growing need for carbon neutrality and demand to reduce CO2 emissions.

BluSky Carbon is publicly listed in Canada on the CSE with the trading symbol BSKY, on the OTCQB as BSKCF, and in Frankfurt, Germany (FWB) with the identifier QE4. BluSky's public filings and related documents are available on the Company's profile page on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca). ### **Forward Looking Information Disclaimer**

This news release contains statements and information that constitute "forward-looking information" within the meaning of applicable securities laws. Such information is based on current expectations, estimates, forecasts, projections, beliefs and assumptions made by management of BluSky. Forward-looking information may also include financial and other projections, as well as statements regarding future plans, strategies, prospects, objectives or economic performance, or the assumption underlying any of the foregoing. In some cases, forward-looking statements can be identified by terms such as "may", "would", "could", "will", "likely", "except", "anticipate", "believe", "intend", "plan", "forecast", "project", "estimate", "outlook", or the negative thereof or other similar expressions concerning matters that are not historical facts.

Forward-looking information is based on current expectations, assumptions, estimates, forecasts, projections, analysis and opinions of management made considering its experience and its perception of trends, current conditions and expected developments, as well as other factors that management believes to be relevant and reasonable in the circumstances at the date that such statements are made, but which may prove to be incorrect. The material factors and assumptions used to develop the forward-looking information contained in this news release include, but are not limited to: regulatory requirements being maintained; general business, economic and political conditions; the Company's ability to successfully execute its plans and intentions; the availability of financing on reasonable terms; the Company's ability to attract and retain skilled staff; market competition; the products and technology offered by competitors; that good relationships with service providers and other third parties will be established and maintained; continued growth of the carbon capture technology industry and positive public opinion with respect to the carbon capture technology industry.

Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company to differ materially from any future results, performance or achievements expressed or implied by the forward-looking information, including, without limitation the Company's limited operating history; negative cash flow; financial position and results of operations differing materially from expectations; the expectation of incurring future losses and never becoming profitable; requiring additional capital to continue operations; reliance on the third-party service providers; strong competition from competitors in the carbon capture technology industry;

technological changes in relation to carbon capture that may adversely affect adoption of current technology or the Company's products; supply and demand for the reduction of carbon emissions; and other risk factors described in the Amended Prospectus. Accordingly, readers should not place undue reliance on any such forward-looking information. Further, any forward-looking information speaks only as of the date on which such statement is made. New factors emerge from time to time, and it is not possible for the Company's management to predict all such factors and to assess in advance the impact of each such factor on the Company's business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking information. The Company does not undertake any obligation to update any forward-looking information to reflect information or events after the date on which it is made or to reflect the occurrence of unanticipated events, except as required by law, including securities laws.

Investors are cautioned to not place undue reliance on forward-looking information, and to carefully review the risk factors described in the Company's Final Prospectus dated May 27, 2024, as amended by Amended No. 1 dated June 11, 2024, available on [www.sedarplus.ca](http://www.sedarplus.ca) under the Company's profile.
